

A photograph of a GM04 RX receiver module with its associated harness. The module is a small, rectangular, off-white plastic unit with two screws on top. It has a blue multi-pin connector on the right side and a red and black two-pin connector on the left. A long, grey, braided shielded cable is connected to the blue connector. The cable is coiled in a large loop on a light brown, textured surface. Two white plastic strain reliefs are visible where the cable enters the module and where it exits the red/black connector. The text "GM04 RX with Harness" is printed in red at the bottom of the image.
