Subject: Labelling Attestation Letter

To whom it may concern

This is to confirm that SECO S.p.A. hereby attests that modular transmitter model LBE616 FCC ID: 2ALZBLBE616 meets the requirements of CFR §2.925(f) *Identification of equipment* in that, because the module is so small that it is impractical to label it with the FCC ID in a font that is four-point or larger, and the module does not have a display that can show electronic labelling, the FCC ID has been placed in the user manual.

SECO S.p.A. further attests that, as we are solely responsible for the integration of modular transmitter FCC ID: 2ALZBLBE61 into host products and no integration of the modular transmitter will be allowed by any third party, no device packaging is supplied and no removable label is attached to the device (because the modular transmitter is always under the control of SECO S.p.A. trained personnel).

SECO S.p.A. further attests that the modular transmitter is only approved for use by us in our own products and not intended for sale to third parties and, therefore, the integration instructions are not particularly detailed.

SECO S.p.A. further attests that the user manual integration instructions are internal confidential manufacturing documents.

Yours faithfully,

Alessandro Pali / Senior Manager
