Bluetooth remote coNtrol

The image of this product may be different from the actual product.

You can use it after connecting the Bluetooth remote control. For more details, refer to the "Device Connection settings".

a L/R button

You can select the left rear seat screen or the right rear seat screen to operate. ba button

- Press to turn the system on/off.
- Press and hold to turn the screen on/off. The sound remains on.

c </^/>/v Controller

Press the button to move to the desired menu or item.

d Select button

Select the desired menu or item.

e LED

When the Bluetooth remote control is connected, the LED lights up when operating.

f Entertainments button (if equipped)

Press the desired Entertainments. (OTT services may differ from region.) g <

button

- Press to move to the previous screen.
- Press and hold to go to the home screen.

 button

Moves to home screen.

m (User) button

- Moves to the screen of the function that the user selected.
- Press and hold to move to the custom button settings screen.
- If you press the button after you select [None] on the rear custom button settings screen, moves to the rear custom button settings screen.

hK /L button

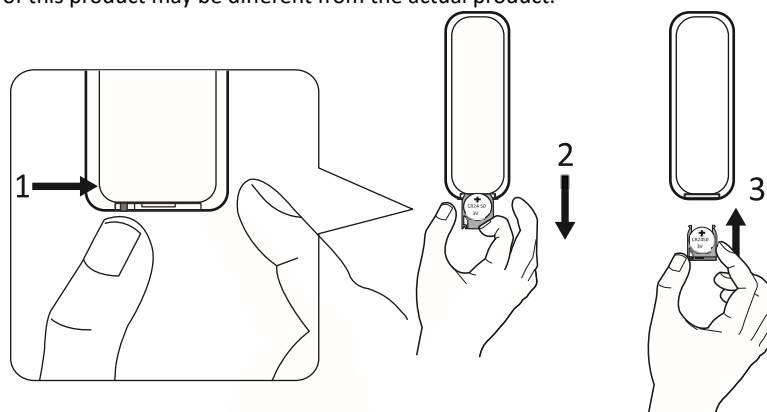

Press the button to adjust the volume.

i (Voice recognition) button (Available on YouTube)

Press and hold the button to search for the desired content by using voice. (Voice recognition may not be supported depending on the software version.)

chaNgIng the Battery oF the Bluetooth remote coNtrol

The image of this product may be different from the actual product.

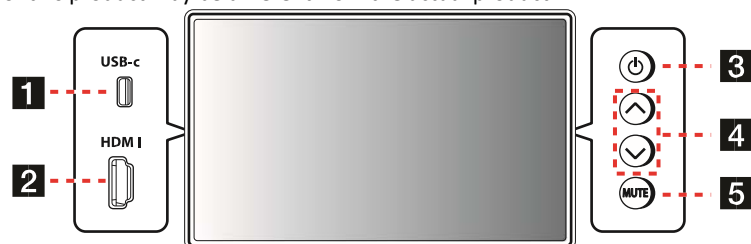

Caution

- There is a risk of fire or explosion if you replace the battery with a battery that does not meet specifications. Replace with a CR2450 or equivalent 3V micro lithium battery.
- Do not heat the batteries in this device above 100 °C.
- Do not swallow batteries. There is a risk of chemical burns.

rear Seat moNitor

The image of this product may be different from the actual product.

- a USB-C
Connect a USB C type storage device to play media.
- b HDMI
Connect an HDMI cable to connect an external device to this unit. ca button
Press the button to turn the rear seat screen on/off.

dS/W button

Press the button up/down to adjust the volume. (You can adjust the volume up to 45 levels.

Detailed control is possible from low to high volume.) e [MUTE] button

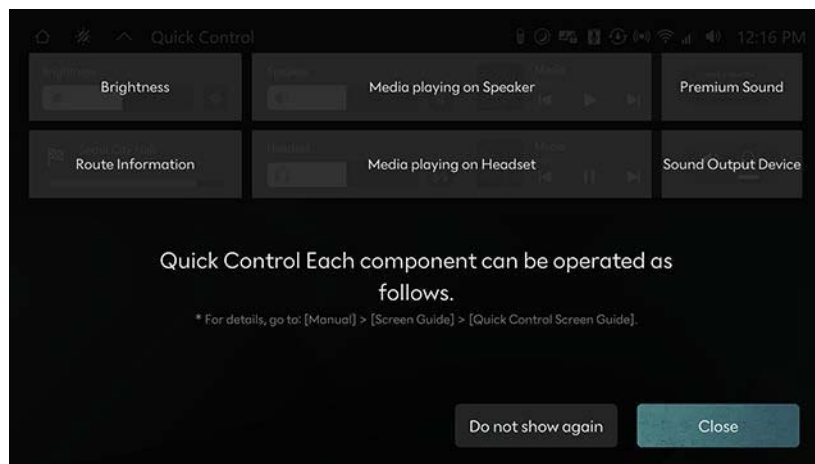

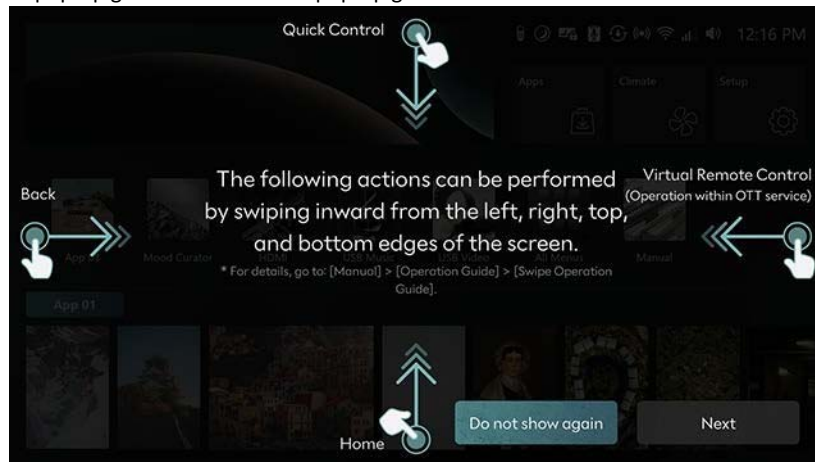

Press the button to turn mute on/off.

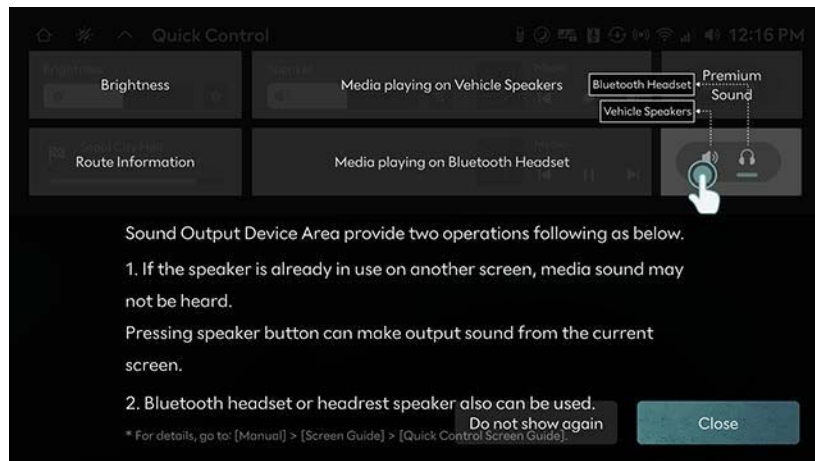

Basic controls

turning the System on

You can reset user designated settings.

1. On the general settings screen, press [Reset].

2. Press [Yes] if you want to reset the system.

update

wireleSS update

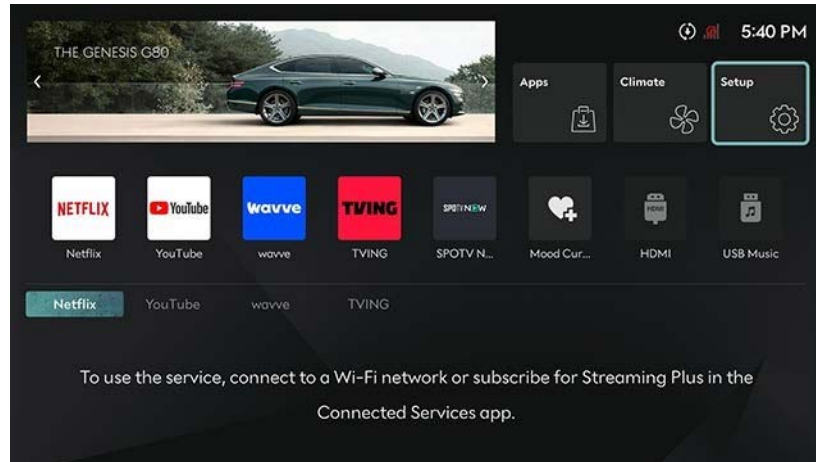

Downloads and installs the latest software automatically through wireless update.

After update, you can check the result by scanning QR code.

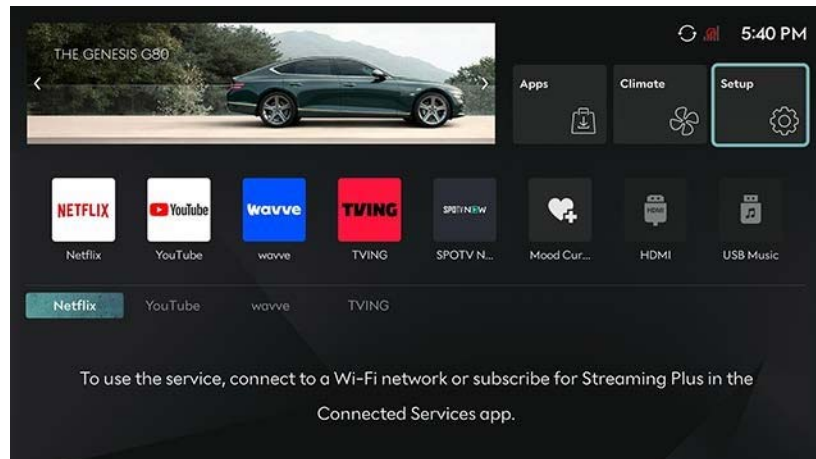

The images displayed on the screen can be differ from the actual one.

If you have signed up for Genesis Connected Services, the system is updated automatically when turning on the vehicle whenever there is a latest version.

1. When turning on the vehicle, the update file is downloaded and the download icon is displayed in top right of the screen.

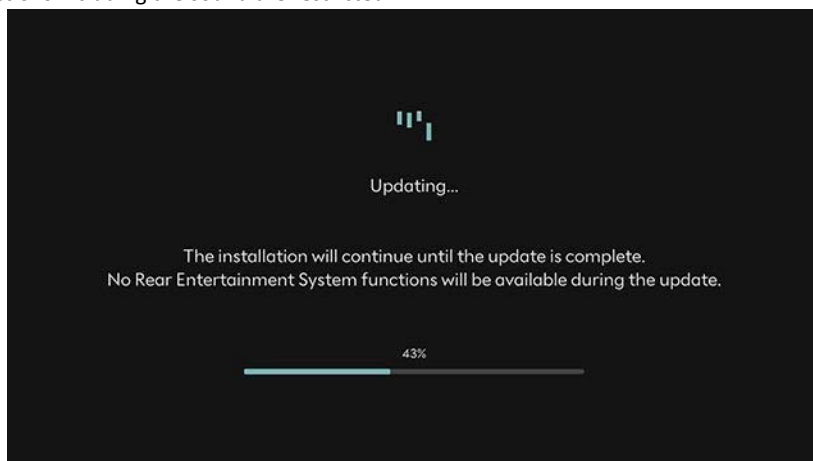

2. After finishing download, software is updated and the update icon is displayed in top right of the screen.

Wireless Update

3. The infotainment system will restart and during the installation of the latest software of it, all functions including the sound are restricted.

4. After update, you can find update record [System Info] > [What's New] on the general settings screen.

 Note

- This function is offered during the subscription on Genesis Connected Services.
- Even if the vehicle is turned off and on again during the update, update is resumed.
- What's New is not displayed right after purchasing the vehicle or in case that update has never been performed.
- If the system failed update, the wireless update is performed automatically when next latest version is distributed.

Before use, please be sure to read precautions for safety and use it properly.

This owner's manual presents warning, caution and reference about the case that a driver or other person can be injured and its response to the case.

Be sure to read and observe this content since it is a very important point related to safety. Please note that the vehicle model shown in the video manual may differ from your vehicle. Please note that the vehicle model and option may differ from your vehicle.

the SymBol uSed iN thiS owNer'S maNual

warning

A symbol about issues that may lead to serious injury and accident related to life if the warnings described in this owner's manual are not observed.

Caution

A symbol about issues that may lead to an accident and bring injury or cause damage or failure of a car if the cautions described in this owner's manual are not observed.

Note

- Explanation about detailed information to understand the right use of product and its function.
- Explanation about related terms in case of explaining its function.

Precautions for safety

precautionS For SaFety

Please keep the precautions for safety since they are to prevent an unexpected accident or danger by using a product safely and properly.

The precautions are divided into 'warning' and 'caution' and the meaning of 'warning' and 'caution' is as follows. **! warning**

The violation of instructions can cause serious injury and death.

	Do not change head unit use environment through voluntary modification of a vehicle and improper operation. It causes traffic accidents. Please dispose of packaging materials (vinyl) out of reach of children. prevent suffocation accidents caused by the packaging.
	Please use it by adjusting the volume at an appropriate sound level. Do not receive audio guidance at a very loud volume. It causes traffic accidents.

Precautions for safety

The company does not take responsibility for any type of accident caused by not following traffic regulations and actual situations

, Caution

The violation of instructions can cause light injury or damage of a product.

	Do not use the system for long hours while the vehicle is not started. Do not use the system for long hours while the vehicle is not started. It can cause a battery discharge. (Even if you turn off the system power with the ACC on, the battery discharge will continue.)
	Do not drop an object on this product or handle it roughly. It causes the failure.
	Do not disassemble or repair or modify it. It causes a fire hazard due to abnormal operation.
	When cleaning the screen, wipe it with a dry, soft cloth after turning off the power. Do not use a hard cloth, chemical rag or organic solvent (alcohol, benzene, thinner) since they may scratch or deteriorate the surface of a head unit.
	Please be careful that water or foreign substances can flow into the device. It generates smoke and causes an ignition and failure.

geNeral iNFormation

cautioNS For the uSe oF uSB

Please use it by installing a USB device after starting an engine. If the vehicle is started with a USB device installed, a USB device can be damaged. If it is not a standard format file, it is not played.

- MP3/WMA file only supports a music file with a compression level of 8 Kbps to 320 Kbps. • Be careful of static electricity when connecting and disconnecting a USB external device.
- If encrypted MP3 player is connected to an external USB device, it is not recognized.
- When connecting a USB external device, it may not be recognized depending on the condition of a USB external device.
- It supports FAT16, FAT32, exFAT and NTFS.
- Some USB devices may not be supported due to compatibility issue.
- Please do not allow human body or object to touch the USB connection.
- Connecting and disconnecting a USB device for a short time repeatedly can cause its failure.
- Please connect and disconnect a USB external device only with the audio power turned off.
- The recognition time can vary depending on the type, capacity and format of a stored file but it is not a product failure.
- When using separate devices like USB HUB and extension cables, the USB may not be recognized. So, please use it by directly connecting to an infotainment system port of a car.
- When uploading an application program in a specific USB, the file may not be played
- When the USB device, that is not recognized as removable discs like MP3 Player, mobile phone and digital camera, was connected, it may not be operated properly.
- The charge through USB may not be supported in case of some mobile devices.
- No operation may be guaranteed except standard product (Metal Cover Type) USB memory.
- The operation of HDD Type, CF and SD memory is not guaranteed.
- The file that applied DRM (Digital Rights Management) is not played.
- The USB memory stick (SD Type or CF Type) used by being inserted into an adapter may not be recognized.

Before you think the product is defective

BeFore you thiNk the product iS deFective

1. You can mistake an error at the time of operating or installing a device as its defect.
2. If you think it is defective, check for defects in the below table.
3. If a problem continue to occur even after checking the below details, please call a

Symptoms	Functions
There are small red dots, blue dots and green dots on the screen.	Since LCD is made with very high dot densities, under 0.01 percent of the total number of pixels, there may be lack of pixel or LED always lit.
No sound is heard and no image is shown.	• Is a starter switch of a car on [ACC] or [ON]? • Isn't the system off?
The USB is not played.	When a USB memory is damaged, please use it after formatting with FAT 12/16/32.
Image is shown but sound is heard.	• Is the volume control set at a low volume? • Is it mute?
A sound is heard only in one speaker.	Dose the volume control of the front and rear and the right and left lean to one side?
It does not operate normally if an external device is connected.	Is the connection of an external device correctly made with a cable with warranty?
The last mode screen is not displayed when the power is OFF > ON.	The mode that plays by reading external source just as USB, iPod and Bluetooth audio mode may not be moved back to the mode shown last when the power is on according to the current condition If the previous mode is not in normal playback condition, it moves back to a previous mode.

designated agent and service centers.

reSpoNSe to Failure SymptomS

Mode	Symptoms	Details of measure
Common	It does not operate normally.	You can reset the system. Refer to 'System Reset' to initialize the system.
	The volume is not played.	Adjust the volume using the remote control.
	The screen is dark.	Adjust the brightness in Setup-Display-Screen Brightness menu.
	Volume and video are not played.	Please check the starter switch of a car is on "ACC" or "ON".
	When the power is on, the corner of the screen seems dark.	The use of LCD panel fluorescent tube for a long time makes itself seem darker over time due to the nature of fluorescent tube and it is not a failure.
USB	The USB is not played.	When a USB memory is damaged, please use it after formatting with FAT 12/16/32.
		If the USB memory is contaminated with foreign substances, please remove them in the contact surfaces between USB memory and infotainment port.
		When a separate USB HUB purchased on the market is used, please use USB memory by directly connecting to a infotainment port of a car.
		When USB extension cables are used, please use them by directly connecting USB memory to a infotainment port of a car.

		If it something else is used other than a standard product, a Metal Cover Type USB memory, please use a standard product USB memory.
		When HDD type, CF and SD memories are used, please use a standard USB memory.
		When there are no playable video clip, and music, please use a sound source of a file format that can be supported.

Response to failure symptoms

Mode	Symptoms	Details of measure
Bluetooth	The remote control is not working.	Check the battery in the remote control.
	The headset is not connected.	Check the power status of the headset.
	The gamepad is not connected.	Check the power status of the gamepad.
	The device is not paired.	Please refer to the device's user manual and pair the device.

aBout the Service

Since the warranty period is calculated from the release of a car (registered date), please receive enough service during the warranty period.

Free Service

The free repair will be provided if you used it normally within the warranty period from the day of purchase and it caused a failure.

The warranty period is subject to the period described in an instruction and a letter of warranty

by car model provided by a car manufacturer. **charged Service**

- In case of mishandling failure by a customer
- In case of failure caused by natural disaster (fire, earthquake, flood damage, falling of a thunder bolt)
- In case of failure due to power abnormality
- In case of failure due to the defects of connecting device
- In case of failure caused by the repair or modification by a person who is not a repairer of a designated service center

compeNSatioN StaNdard For cuStomer damage

The compensation standard for customer damage of this product is based on customer dispute settlement standard posted by Fair Trade Agreement

Please be careful that if the metalized tint film (2 tons of them) with metal components is attached on a car that the glass antenna is applied, it can degrade the reception performance of this product.

The components being replaced during repair can be the used components from the different country of origin or manufacturer but the same component that has normal operation is used.
