Subject: Class II Permissive Change FCC ID: EHA-IM11

Dear Application Examiner:

Honeywell International Inc is submitting an application for a Class II Permissive Change to permit a new co-location condition of Intermec Model: IM11 RFID radio module (FCC ID: EHA-IM11), which is currently permitted for co-location with BlueGiga Model: WT12 Bluetooth radio module (FCC ID: QOQWT12), contained within the Intermec Model: IP30C Handheld RFID Reader.

The new co-location condition includes the Honeywell Model: CK65L0N (FCC ID: HD5-CK65L0N) mobile computer, which will act as a host computer to mechanically attach and interface with IP30C Handheld RFID Reader. The IM11 radio module will be co-located with the BT/BTLE/WLAN/NFC radios contained within Honeywell Model: CK65L0N mobile computer. The two devices interface through Bluetooth pairing.

In this configuration, only hand-held use is possible, so MPE estimates were performed for the co-located radios. In addition to the RF Exposure report that documents compliance for body exposure, extremity SAR for the handheld use condition was evaluated in a separate test report.

No changes have been made to the hardware or software of the radios in these co-located configurations.

Your efforts in reviewing this application are greatly appreciated. Please contact me if there are questions or additional information needed concerning this request.

Sincerely,

Sean MacKellar
