The P7QNPM-7 is a dual Band Transceiver that supports the GSM 1900 Band in the USA. The electrically identical transceiver is available in a number of metal finishes, to include:

Stainless Steel,  
Platinum,  
Yellow Gold.

And combinations of the above.

The construction of the transceiver incorporates shielding on both sides of the Engine board acting as primary shielding. For compliance and performance purposes the metal finishing components effectively act as secondary shielding ONLY.

For the various metal finishing components, where applicable metal parts are replaced with similar parts of different composition. In all cases metal parts, are replaced by other metal parts for these cosmetic changes. In this way product performance is maintained for all cosmetic variants, as supported by test data obtained.

In addition the P7QNPM-7 transceiver is designed to interoperate with the following dedicated accessories:

Charger: ACV - A  
Battery: BLZ - 2  
Headset: HSV – A, and Belt Holster : BH2 – AL01  
Data Cable: DLV – A  
Desk Stand: DTV - A
