Columbia MD 21046

Subject: Statement of Attestation - Low Power Indoor Client

Ref: FCC numbers

Model(s)	FCC ID
A2686	BCGA2686

To whom it may concern:

Apple Inc., attest that these devices comply with the device protocol requirements and operational restrictions for indoor client 6XD.

- a. This device will only associate and connect with a low-power indoor access point or subordinate device and never directly connect to other client devices.
- b. This device will always initiate transmission under the control of a low-power indoor access point or subordinate device except for brief transmissions before joining a network. These short transmissions will only occur if the client has detected an indoor access point or subordinate operating on a channel. These short transmissions will have a time-out mechanism such that if it does not receive a response from an access point, it will not continually repeat the transmission.
- c. Transmissions will be lower or equal to the power advertised by the indoor low-power access point or subordinate and never above the maximum output power allowed by the FCC grant for the equipment class 6XD.
- d. Furthermore, we fully understand this device is prohibited from the control of or communicating with unmanned aircraft systems, including drones.

For any questions, please feel free to contact me.

Sincerely,

---
