1x Type-A to Type-C Adapter

#### Receiver

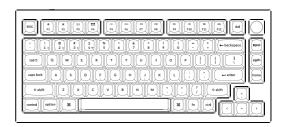

1x Type-A 2.4 GHz Receiver

### Tools

1x Keycap & Switch Puller

1x Screwdriver

1x Hex Key

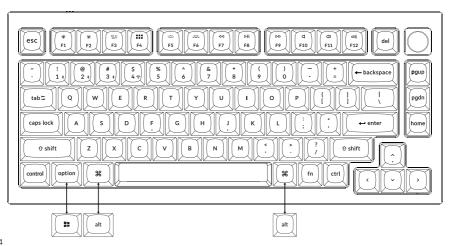

# **Quick Start Guide**

If you are a Windows user, please find the appropriate keycaps in the box, then follow the instructions below to find and replace the following keycaps.

## Mac / Windows

## 1 Connect 2.4 GHz Receiver

Type-C Cable Extension Adapter For Receiver Secretary

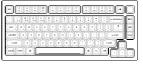

# Connect the 2.4 GHz receiver to the device USB port.

### Switch toggle to 2.4 GHz mode

G = 2.4 GHz

Note: For the best wireless experience, we recommend using the extension adapter for receiver and putting the 2.4 GHz receiver somewhere on your desk close to your keyboard for a low rate of latency and fewer signal interferences.

## 2 Connect Bluetooth

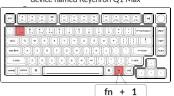

Switch toggle to Bluetooth

Press fn + 1 (for 4 seconds) and pair with device named Keychron Q1 Max

## 3 Connect Cable

## Switch toggle to Cable

## 4 The VIA Key Remapping Software

Please visit <u>usevia.app</u> to use the online VIA software to remap the keys. If the VIA cannot recognize your keyboard, please reach our support to get the instruction.

- \* The online VIA software can only run on the latest version of Chrome, Edge, and Opera browsers yet.
- \* VIA only works when the keyboard is connected by wire to the computer.

## **5** The Layers

There are four layers of key settings on the keyboard. The layer 0 and layer 1 are for the Mac system. The layer 2 and layer 3 are for the Windows system.

If your system toggle is switched to Mac, then the layer 0 will be activated.

If your system toggle is switched to Windows, then the layer 2 will be activated. Remember that if you are using it in Windows mode, please make changes to the layer 2 instead of the top layer (the layer 0). This is a common mistake people are making.

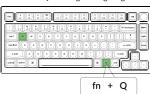

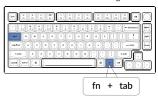

## 6 The Backlight

Press fn + Q to change the lighting effect

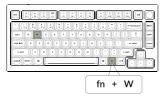

## Press fn + tab to turn the backlight on/off

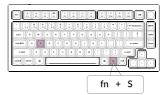

## **7** Adjust The Backlight Brightness

Press fn + W to increase the backlight brightness

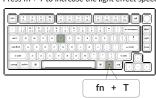

Press fn + S to decrease the backlight brightness

## 8 Adjust The Backlight Speed

Press fn + T to increase the light effect speed

Press fn + G to decrease the light effect speed
