

2. Photograph for the test configuration

3. Sample Calculation

The emission level measured in decibels above one microvolt (dB μ V/m) was converted into microvolt per meter (μ V/m) as shown in following sample calculation.

For example :

| | | | |
|-------|------------------------------|------------------|--------------------|
| | Measured Value at | <u>0.125 MHz</u> | 66.8 dB |
| + | Antenna Factor | | 9.9 dB |
| + | Cable Loss | | 0.0 dB |
| | Preamplifier | | 0.0 dB |
| | Distance Correction Factor * | | 80.0 dB |
| <hr/> | | | |
| = | Radiated Emission | | - 3.3 dB μ V/m |
| | | | (= 0.7 μ V/m) |

* Extrapolated from the measured distance(3 m) to the specified distance(300 m) using the square of an inverse linear distance extrapolation.
