

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a wooden workbench holds a spectrum analyzer. A red cable connects the analyzer to a power supply unit on the floor. The power supply is connected to a device under test (DUT) on a wooden table to the right. A power strip is visible on the wall behind the power supply.
Radiation Emission Test View (30MHz to 1GHz)	 A photograph showing a radiation emission test setup. A white, rectangular test chamber is positioned in the center. The chamber is surrounded by a metal frame with vertical rods. The background wall is covered with a grid of white, square-shaped absorbers. The floor is a dark, reflective surface.
