Register Tag

Important

Registration must be completed within one minute of switching on power to the Base Unit.

1. When you have fitted the Tag battery, bring the Tag near to your LifeTag system Base Station and switch on power to the Base Station.

2. IMMEDIATELY press and release Tag button, to activate (switch on) the Tag

3. Press and release Tag button again.

4. Check that within the next 15 seconds, registration starts.

Note: If registration does not start, switch the Base Station off then on again, then repeat steps 2 to 4

REGISTRATION START

REGISTRATION COMPLETE

5. When registration is complete, the Tag is operational and ready to be used with your LifeTag system.
