RE: Cover Letter for Inventek Systems Model: ISM14585-L3-P8, FCC ID: O7P-14585 and  
IC: 10147A-14585

On behalf of Inventek Systems, we are submitting for your review an application for Permissive Change in order to add an MPE – SAR Exhibit to show that this Module is exempt. The purpose of the submittal is for the module to be deemed a portable device and to so note in the certification descriptions and grant notes.

Their User Manual has been updated to remove requirements for a 20 cm separation distance, but all other documentation is unchanged. An updated copy of the User Manual is attached along with the following supporting documentation:

- Applications (FCC and ISED)
- Agency Agreements (FCC and ISED)
- Canadian Rep Agreement
- Original FCC and ISED Certificates
- Original FCC and ISED Report
- New MPE/SAR Exhibit

Best Regards,

A handwritten signature in cursive script that reads 'Sandi McEnergy'.

Sandi McEnergy  
Agent for Inventek Systems
