Dear Sir/Madam,

This communication is in response to your request for additions to the Itronix user guide that includes warning information for a by-stander to be in excess of 20cm from the transmitting antenna.

I have had a request from Itronix that this distance be shortened to 5cm for a by-stander as per a previous Itronix FCC submission (FCC ID:KBCXC6250RIM901) This used the same lap-top (XC6250) with a different modem integration with a higher output transmitter (1.7W) as compared to 0.6W for this Sierra Wireless modem integration submission.

I have included a copy of the Itronix Technical Bulletin for the XC6250 (RIM Modem) previous integration to see if this is acceptable for this integration with a Sierra Wireless modem.

Sincerely

Richard Utting, C.Eng.
