

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a spectrum analyzer sits on a wooden table, displaying a graph on its screen. A red cable connects it to a power supply unit on the floor. The power supply is connected to a power strip on the wall. To the right, a wooden table holds a small black device, possibly a test fixture or antenna, connected to the power supply.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test chamber. The walls are lined with white, square-shaped electromagnetic interference (EMI) absorbers. In the center, a yellow cardboard box sits on a blue metal stand. The floor is metallic and has yellow and black striped safety tape. A blue storage bin is visible in the bottom left corner.

**Radiation Emission Test
Setup (30MHz to 1GHz)**

**Radiation Emission Test
Setup (1GHz to 18GHz)**

**Radiation Emission Test
Setup (Above 18GHz)**
