7435 Oakland Mills Road  
Columbia, MD 21046

To whom it may concern:

Structured Monitoring Products, LLC, hereby requests a Permissive Change Class II of the radio equipment certification for the VetGuardian certification number, FCC ID: 2ARN8-SMPVG02. This product differs from the originally approved product in the following manor:

- (a) Associated digital circuitry. – There were no changes to the output power. A RF Filter and variable attenuator was added to the output of the VCO circuit.
- (b) Functional capabilities. – The variable attenuator can be controlled via firmware and set at manufacturing time but it is not changeable by the user.
- (c) Antenna Characteristics. – There are no changes to the antenna.
- (d) Cosmetic differences – A RF shield was added to the PCB covering the VCO.
- (e) There are no other changes.

I do attest that the Field strength and/or RF Output readings remained the same or are lower than the originally approved product and that they did not increase therefore qualifying this product for this application type.

Sincerely,

Kenneth Balogh  
Senior Director Product Development  
Structured Monitoring Products
