

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

**EUT Housing and
Board View 1**

**EUT Housing and
Board View 2**

Solder Board-Component View 1	 This image shows the top view of a red printed circuit board (PCB) assembly. The board is populated with various electronic components, including integrated circuits, capacitors, and resistors. A green ribbon cable is connected to the bottom edge of the board. A metal ruler is placed horizontally below the board, showing a scale from 1 to 20 centimeters. The board is set against a blue textured background.
Solder Board-Component View 2	 This image shows the bottom view of the same red PCB assembly. It displays the reverse side of the components and the soldering on the underside of the board. The green ribbon cable is visible at the top edge. A metal ruler is placed horizontally below the board, showing a scale from 1 to 20 centimeters. The board is set against a blue textured background.

Solder Board-Component View 3	 A photograph showing the solder side of a small electronic board component. The component is rectangular with a large, flat, silver-colored solder mask covering most of its surface. It is positioned next to a metal ruler for scale. The ruler has markings in centimeters (0 to 15) and millimeters (0 to 15). The component is approximately 6 cm wide and 4 cm high. The background is a blue textured surface.
Solder Board-Component View 4	 A photograph showing the solder side of the same board component from a different angle. The component is rectangular with a green solder mask. It is positioned next to a metal ruler for scale. The ruler has markings in centimeters (0 to 13) and millimeters (0 to 13). The component is approximately 6 cm wide and 4 cm high. The background is a blue textured surface.

Solder Board-Component View 5	 A photograph of a small green printed circuit board (PCB) component, likely an RFID antenna, placed on a blue textured surface. The component is rectangular with a gold-colored edge and features various electronic components, including a central chip and several surface-mount components. A metal ruler is positioned vertically to the left of the component, showing measurements in centimeters (0 to 11) and millimeters (0.5 to 10). Another metal ruler is positioned horizontally below the component, showing measurements in millimeters (0 to 9). The component is oriented horizontally, with its longer side parallel to the vertical ruler.
Antenna View	RFID Antenna  A photograph of the RFID antenna assembly, showing the green PCB component mounted on a larger, rectangular metal frame. The frame is made of a light-colored material, possibly aluminum, and has several rectangular cutouts. The antenna is connected to the frame by thin wires. A red rectangular box highlights the antenna assembly, and a red line points from the label "RFID Antenna" to the box.
