AIBOT2

AI humanoid robot

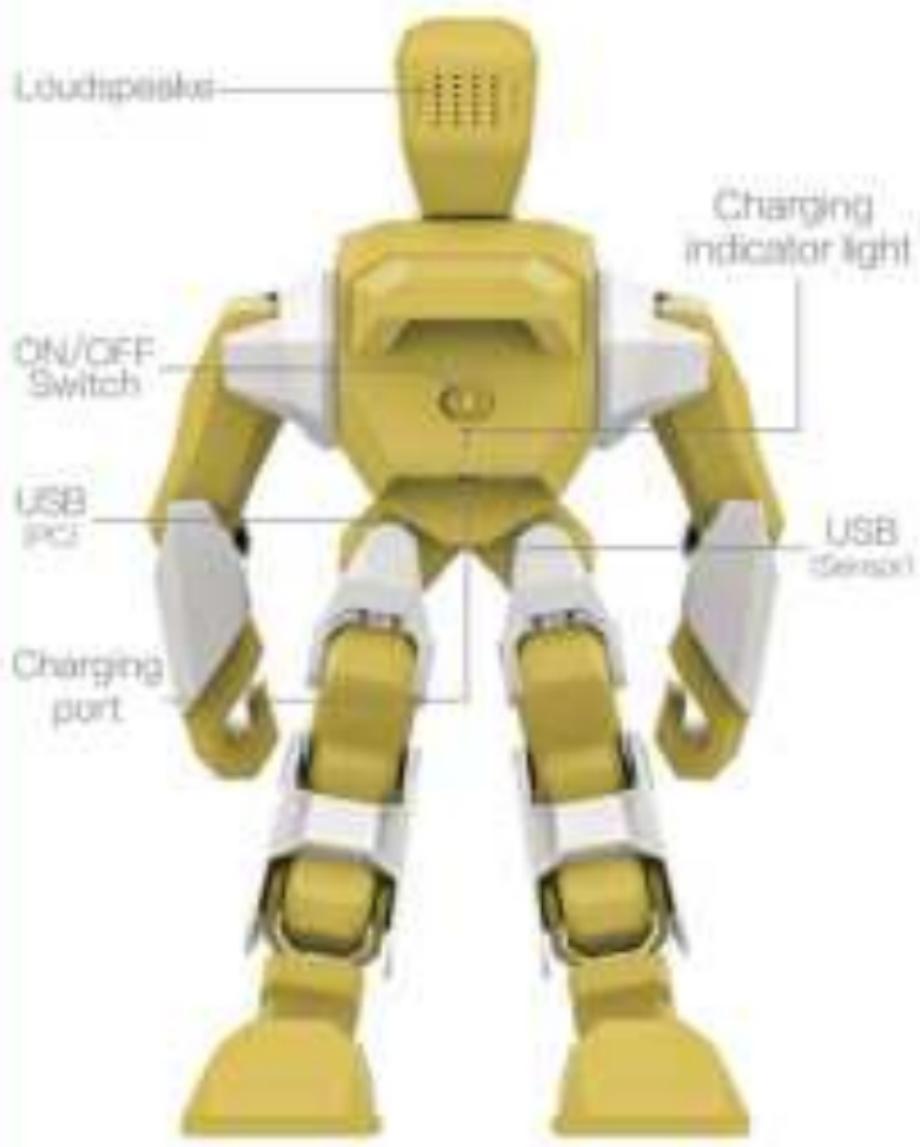

Instruction manual

Knowing AIBOT2

• This manual contains important information, please keep it for future reference.
The pictures are for reference only, please refer to the actual product for accuracy.

Basic parameters

Product name: AGV-1 A humanoid robot

Product model: E12-

Power input: 5V±2%

Body material: Environmentally friendly plastic-Metal

Movement mode: Intelligent servo control system

Battery: Polymer Power battery

Speed: 150mm/s acceleration

Camera: Wide-angle camera

Operator mode: voice, touch, APP, Bluetooth connection

OS interface: Linux system, open G interface

Working temperature: 0°C~40°C

Working humidity: <80%

Function Description

Voice Interaction

Say "Hey Robot" to enter robot interaction mode, when you hear A B0T2 prompt sound: 'I'm here!', you can interact with A B0T2 voice through the following voice commands:

Help **Roll forward** **Crawling forward**

I love you **Roll backward** **Turn Right**

Come here **Turn left** **Move backward**

Make a split / Splits **Move forward**

Side kick / Side kick left / Side kick right

Sing a song **Turn Back** **Left hook**

Spacewalk **Shake head** **Right hook**

Do push-ups / One arm push up / Push up

Show time / Dance / Dancing **Do stunts**

Tell a story **I hate you / I don't like you**

Go away / Get lost / Beat it **Give salute**

Touching A B0T2 head and saying "goodbye, no more chatting, stop talking" can both exit the voice interaction mode.

FAQ

- Q: A B0T2 can only understand one language, how about if I want to use multiple languages?
- Q: A B0T2 is a personal robot, how can I teach it new skills and how can I expand its functions?

Charging instructions

Charging must be done through the $5V=2A$ charge provided by AIHO V. The indicator light shows red when charging and green when fully charged.

idle sleep

If the unit has no interaction, it will sleep on idle screen around 10% automatically enter sleep mode after 8 minutes. It needs to use regular and to wake up.

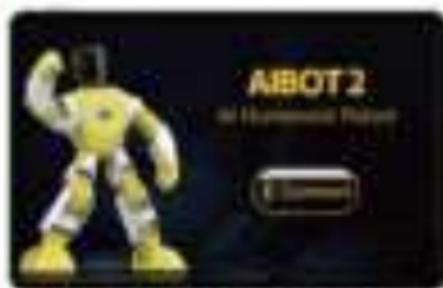

The App

Download

Scan the "AIBOT2 App Download QR Code" below to download. After successful installation, the app needs to obtain the mobile Bluetooth and location permission.

Bluetooth connection

1. Turn on AIBOT2 and start the AIBOT2 App;
2. Open Bluetooth and location permissions on the phone;
3. Click on Bluetooth connection on the app homepage, and the app will automatically search for the Bluetooth signal of AIBOT2;
4. Select the AIBOT2 that needs to be connected and click to start connecting.

Click the connect button

Bluetooth connection interface

Access to this interface after connection

Scan Or Click Download File

Group show

Simply connect and control a AIBOT2 host to connect all slaves within a radius of 10 meters around it, thus achieving a group performance of multiple machines acting in unison.

Operation Steps:

a: Slave mode setting (AIBOT2 controlled by the host):

1. Open the app and the connection will be treated as the AIBOT2 of the slave;
2. Enter the group show interface, click ① to indicate that the slave mode of the AIBOT2 has been turned on (click again to turn it off);
3. Complete the setup and exit the app;
4. All slaves must repeat the above three steps.

If you only need one AIBOT2 performances, turn off the host mode.
Only one host can send WiFi in the control range.
Otherwise, it will cause chaos in the performance of AIBOT2.

b: Host Mode Settings (See AIBOT2 for performance actions)

1. Open the app and connect to AIBOT2, which will be treated as the host;
2. Enter the Group show Interface;
3. Click ① to turn on the host mode(click again to close). After the host mode is turned on, all nearby AIBOT2 devices that have turned on slave mode will be automatically connected and a voice message will be played saying "Enter group performance slave mode".
4. Click on the command icon in ② , and the icon will be automatically added to the editing area;
5. Click ③ to start the group performance.

If you only need one AIBOT2 performance, turn off the host mode;

Only one host can exist within the control range,

otherwise it will cause chaos in the performance of AIBOT2.

Setting

In the settings, you can adjust the volume, check battery level, contact customer service, view frequently asked questions, learn about us, provide feedback, control the voice wake-up function, and toggle the sleep mode and dance-to-music function.

Notices

- When using AEDT2, it is necessary to be supervised by an adult.
- Please run AEDT2 on a spacious and flat surface;
 - It is recommended that users of this product use **SPOT 17** and **SPOT 20**;
 - AEDT2 contains heat and may cause heating, which is a normal phenomenon;
 - AEDT2 cables may not tangle with other cables (e.g. chair, trees, etc.) or stalked with dust, slippery objects (such as plastic cloth), which need to be cleaned in a timely manner;
 - To ensure the optimal service life of the device, it is recommended to use AEDT2 for no more than 1 hour per use;
 - When AEDT2 experiences abnormal situations, please immediately cut off the power to prevent injury or damage to AEDT2;
 - Do not forcefully squeeze, twist, or pull AEDT2 and any joints to prevent being crushed and damaged AEDT2;
 - Do not place AEDT2 at high places, edges, or inclined surfaces to prevent injury or damage to AEDT2 falling;
 - Do not allow children or pets to bite the root or its components, in order to avoid injury or malfunctions of the AEDT2;

ABDT2 and its accessories to its operation.
electronic components and should not be used in
water or excessively humid environment to avoid
shorting damage.

- Do not place ABDT2 near heat sources or exposed
sources of fire, such as electric heaters, ovens,
stoves, candles, or other places that generate high
temperatures;
- Please do not forcefully open ABDT2 to prevent
internal components from being damaged by
falling. The built-in battery cannot be disassem-
bled or replaced;
- Do not let ABDT2 under strong sunlight and
magnetic fields;
- After the ABDT2 plays a low battery prompt sound,
please charge it in a timely manner to avoid any
abnormal phenomena;
- Please use the charger provided by ABDT2 for
charging. For your and your child's safety, we have
also implemented charging protection measures.
- Please do not use ABDT2 while carrying as it must
be operated by an adult;
- The charger must be cleaned for damage to the
wires, plugs, casing, and other components before
use or regularly. If damage is found, it should be
banned from use.

In places where there are explicit regulations prohibiting the use of mobile phones, please do not use ABBOT2, otherwise it may interfere with other electronic devices or cause other damage. The interpretation of this manual belongs to our company within the scope mentioned by law, and any changes are subject to change without prior notice.

FAQ

- 1. Unable to power on:
 - Maybe APR012 ran out of battery, try to power it or replace it or recharging it.
- 2. Unable to charge:
 - Is there a charging indicator light on during charging? If it doesn't light up, you can try replacing the charging adapter;
 - Check if the charging interface of the robot is normal, and if it is damaged, it needs to be replaced.
- 3. Abnormal functionality during use:
 - Robots are complex mechanical devices, have probabilistic functional characteristics and can be affected by environment or not again.
- 4. Poor recognition performance when using voice detection function:
 - The recognition effect is poor, which may be due to the noisy surrounding environment, you can try moving to a quieter environment.
- 5. When pushing audio through Bluetooth on a mobile phone, there is a stuttering sound:
 - If the distance between the mobile phone and the robot is too far or there are many obstacles, you can try to open up a nearby area.

6. This sound of incoming photo cells is passed on the AHC012 host, and receiving messages on the short wavelength that A DOT2 is playing.
AHC012 has connected to his character Bluetooth, which is a normal connection. If this function is not needed, please rapidly disconnect AHC012 from the phone's Bluetooth connection.
7. AHC012 has abnormal contact with the sensor base.
If Abbott causes the sensor base to loosen from the connecting wire or sensor base to collision, fall, or other factors, please unplug the connecting wire or sensor base, reconnect it.
Check if there are any abnormalities in the interface of AHC012, sensor base, sensor, and connecting wire. If there is any damage, it needs to be repaired.

The name and content of harmful substances in this product

Part name	REACH	RoHS	CLP	SVHC	ENEL	EURO
Pad and soil sensors	O	O	O	O	O	O
PCU sensor and impedance	X	O	O	O	O	O
Encoder	O	O	O	O	O	O
Filter	O	O	O	O	O	O
Speaker	O	O	O	O	O	O
Speaker	O	O	O	O	O	O

This table is prepared in accordance with the provisions of G.U.T. 1054.

O: The content of the harmful substance in all homogeneous materials of the component, satisfies the limit requirements specified in G.U.T. 26572.
 X: Indicates that an amount of the hazardous substance in at least one homogeneous material of the component exceeds the limit requirements specified in G.U.T. 26572.

Note: All components marked with "X" in the table cannot be fully lead-free due to current limitations in industry test methodology.

5 The number is not yet represented in service life of the product under normal service conditions.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced technician for help.
- To assure continued compliance, any changes or modifications not expressly approved by the party,

Responsible for compliance could void the user's authority to operate with equipment (example - no use of video intercom cables when coexisting to compliance or potential interference).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference; and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement:

This equipment complies with FCC Radiation exposure limits set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the antenna and your body.

Remote control

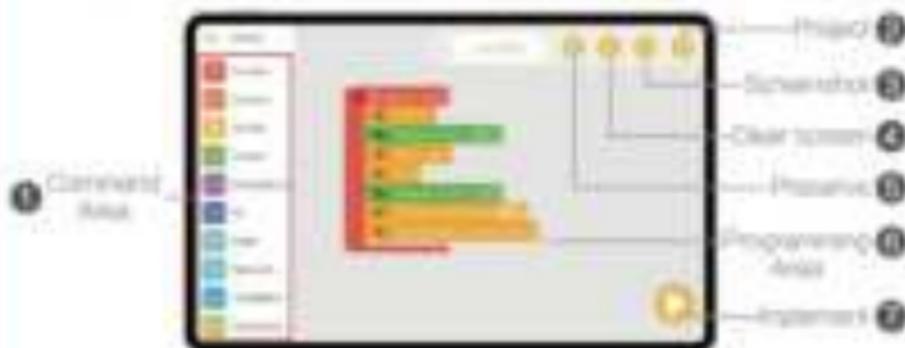

Control AIBOT2 movement and action performance through the app, achieving dynamic remote control function.

On the left, control AIBOT2 movement, and on the right, select action commands or switch action modes.

Programming

Using AIBOT2 graphical programming software, writing programs is as simple as building blocks. By dragging and stacking the program, AIBOT2 can be controlled, allowing even children with zero foundation to experience the joy of programming.
