Explanation for status indicator LED

OOOOOO SOUND LEVEL

The first green indicator is steady on: indicating successful connection between the camera and the receiver.

The first to the fifth green indicators slowly flash simultaneously: indicating power on, but camera not connected.

The second to the fifth green indicators slowly flash from low to high: indicating the received volume

The second to the fifth green indicators slowly flash simultaneously: indicating that the alarm signal is received.

The sixth red indicator is steady on: indicating that the lithium battery is being charged; (displayed whether it is turned on or off)

The sixth red indicator is off: indicating that the battery is fully charged.

Using the Monitor

Place the Camera Unit in a convenient location (e.g. on a table or a shelf) and point the camera lens toward the area you want to monitor.

NOTE:

Do not place the Monitor Unit within baby's reach. If there is interference with the picture or sound, try moving the units to different locations, and ensure they are not close to other electrical equipment.

AWARNING

Strangulation Hazard:

Children have STRANGLED in cords. Keep this cord out of the reach of children (more than 3feet(0.9m) away). Never use extension cords with AC Adapters.Only usse the AC Adapters provided.

Preparation before using camera

1. Powering the Camera Unit

Insert one end of the included charging cable into the USB jack on the back of the camera.

Preparation before using receiver

1.Power on the receiver (The receiver is provided with a lithium battery, if the receiver has enough power, please go directly to the Step 2).

Insert the other end into the included power adapter. Then insert the adapter into the socket.

2. Receiver starting up

Press and hold the 🛞 button on the receiver to start the receiver

At this point, a monitor screen will appear on the receiver.

Note: This device has been paired before leaving the factory. If the receiver fails to display on the monitor screen as described above, please re-try the device pairing operation. For detailed steps, please refer to Page 9 "Camera Pairing".

After being powered on, the camera will automatically turn on. (The green light on the base of the camera is on for a few seconds. At this point, the camera is turned on successfully).

CE and FCC Certification Information

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonableprotection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference

(2) This device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information:

FCC RF Exposure requirements: The highest 1g SAR value reported under this standard during product certification for use body exposure condition with the minimum separation distance of 0mm is 0.02W/Kg.This transmitter must not be collocated or operating in conjunction with any other antenna or transmitter. This product is compliance to FCC RF Exposure requirements and refers to FCC website https://apps.fcc.gov/oetcf/eas/reports/ GenericSearch.cfm search for FCC ID: TW5GD7605

This equipment complies with radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. This equipment should be installed and operated with minimum distance 20cm between the radiator& your body. This product is compliance to FCC RF Exposure requirements and refers to FCC website https://apps.fcc.gov/oetcf/eas/reports/GenericSearch.cfm Search for FCC ID: TWSGD8205

Hereby, we declares that this device is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU.

Notice: Observe the national local regulations in the location where the device Is to be used. This device may be restricted for use in some or all member states of the European Union (EU)

EU Environmental Provisions

E-waste cannot be mixed with household garbage; corresponding local government sector or recycling stations shall be responsible for circular process.
