## **Module Approval Checklist**

FCC ID: E2KT99W640

stand-alone configuration inside of another device during testing  The module must be labeled with its permanently affixed FCC ID label, or use an electronic display ID, and for OEM integration the integration manual contains labeling instructions for the host device per Part 15.212 (vi)  The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions specific requirements addressed to the integrator and/or	Item	Requirements	EUT
capacitor(s) may be located external to the shield, but must be on the module assembly  2. The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal  3. The module must contain power supply regulation on the module  4. The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per §§ 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b)  5. The module must demonstrate compliance in a stand-alone configuration  6. The module must be labeled with its permanently affixed FCC ID label, or use an electronic display  7. The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions  The module approved transmitter complies with all applicable rules and the integration manual contains any specific requirements addressed to the integration and/or applicable rules and the integration manual contains any specific requirements addressed to the integration and/or applicable rules and the integration manual contains any specific requirements addressed to the integration and/or applicable rules and the integration manual contains any specific requirements addressed to the integration and/or applicable rules and the integration manual contains any specific requirements addressed to the integration and/or applicable rules and the integration manual contains any specific requirements addressed to the integration and/or applicable rules and the integration and/or applicable rules and the integration and/or applicable requirements addressed to the integration and/or applicable rules and the integration and/or applicable rules and the integration and/or applicable requirements addressed to the integration and/or applicable rules and the int	1.
