Columbia MD 21046-1609

SUBJECT: Class II Permissive Change for FCC ID: S9E-EM7565, Model: EM7565

The product has been granted by FCC dated **08/03/2020** under FCC ID: S9E-EM7565. The intention of this application is to enable the modular granted under FCC ID: S9E-EM7565 to be integrated in Trimble Rugged Handheld Computer, Model: 121900.

This device will disable LTE Band 30/48 operation permanently when sold in Canada by software. LTE Band 30/48 operation will not enabled/overridden by end users via any other means.

The module installed into the host platform mentioned above is electronically and mechanically identical to the original certified module. The Original FCC testing on module under FCC ID: S9E-EM7565 was performed with an antenna of higher gain, and the antenna was connected to the module in an open environment. The current host platform under application uses an antenna with lower gain and is installed inside the host platform enclosure. The physical restraints introduced by the host platform should have resulted in equal or lower level of radiated emission. Therefore, additional Radiated emission testing is not necessary.

A handwritten signature in black ink, appearing to read 'K. Allen', with a long horizontal stroke extending to the right.
