

FCC RF EXPOSURE INFORMATION

WARNING! *Read this information before using your phone*

In August 1996 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards.

CAUTION Use only the supplied or an approved antenna. Unauthorized antennas, modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations.

Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

Body-worn Operation

This device was tested for typical body-worn operations using the optional belt-clip/holster to provide a separation distance of 1 inch (2.54cm) from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 1 inch (2.54cm) must be maintained between the user's body and the belt-clip/holster, including the antenna, whether extended or retracted. Third-party belt-clips, holsters and similar accessories used by this device must meet the separation distance requirement of 1 inch (2.54cm) from the body, and should not contain any metallic components. Body-worn accessories that do not meet these requirements, may not comply with FCC RF exposure limits and should be avoided.
