FCC §15.247 (i) & §1.1307 (b) (3) & §2.1091- MPE-BASED EXEMPTION

Report No.: SZ4240221-08602E-RFA

Applicable Standard

According to KDB 447498 D04 Interim General RF Exposure Guidance

MPE-Based Exemption:

An alternative to the SAR-based exemption is provided in § 1.1307(b)(3)(i)(C), for a much wider frequency range, from 300 kHz to 100 GHz, applicable for separation distances greater or equal to $\lambda/2\pi$, where λ is the free-space operating wavelength in meters. The MPE-based test exemption condition is in terms of ERP, defined as the product of the maximum antenna gain and the delivered maximum time-averaged power. For this case, a RF source is an RF exempt device if its ERP (watts) is no more than a frequency-dependent value, as detailed tabular form in Appendix B. These limits have been derived based on the basic specifications on Maximum Permissible Exposure (MPE) considered for the FCC rules in § 1.1310(e)(1).

Table 1 to § 1.1307(b)(3)(i)(C) - Single RF Sources Subject to Routine Environmental Evaluation

RF Source frequency (MHz)

0.3-1.34

1,920 R².

1.34-30

3,450 R²/f².

30-300

3.83 R².

300-1,500

0.0128 R²f.

1,500-100,000

19.2R².

f = frequency in MHz;

R = minimum separation distance from the body of a nearby person (appropriate units, e.g., m);

For multiple RF sources: Multiple RF sources are exempt if:

in the case of fixed RF sources operating in the same time-averaging period, or of multiple mobile or portable RF sources within a device operating in the same time averaging period, if the sum of the fractional contributions to the applicable thresholds is less than or equal to 1 as indicated in the following equation:

$$\sum_{i=1}^{a} \frac{P_i}{P_{th,i}} + \sum_{j=1}^{b} \frac{ERP_j}{ERP_{th,j}} + \sum_{k=1}^{c} \frac{Evaluated_k}{Exposure\ Limit_k} \le 1$$

Result

For worst case:

| Mode | Frequency (MHz) | Tune up conducted power [#] | Antenna Gain [#] | | ERP | | Evaluation Distance | ERP Limit |
|------------|--------------------|---|------------------------------|-------|-------|-------|------------------------|--------------|
| | | (dBm) | (dBi) | (dBd) | (dBm) | (mW) | (m) | (mW) |
| 2.4G FHSS | 2402-2476 | 6 | 1.45 | -0.7 | 5.3 | 3.39 | 0.2 | 768 |
| 2.4G Wi-Fi | 2412-2472 | 17 | 1.45 | -0.7 | 16.3 | 42.66 | 0.2 | 768 |

Report No.: SZ4240221-08602E-RFA

Note 1: The tune-up power and antenna gain was declared by the applicant.

Note 2: 0dBd=2.15dBi.

The 2.4 G FHSS and 2.4G Wi-Fi can't transmit simultaneously.

To maintain compliance with the FCC's RF exposure guidelines, place the equipment at least 20cm from nearby persons.

Result: Compliant
