iLuv

Bluetooth Alarm Clock Speaker with Wireless charger and FM Radio

Morning Call iQ

User Manual (Ver 1.0)

WARNING AND SAFETY INSTRUCTIONS

To reduce the risk of electric shock, do not remove cover (or back). No user serviceable parts inside. Refer servicing to qualified service personnel.

CAUTION TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK)

This symbol indicates that dangerous voltage constituting a risk of electric shock is present within this unit.

This symbol indicates that there are important operating and maintenance instructions in the literature accompanying this unit.

1. Before using this product, read the operating instructions, safety instructions, and warnings.
2. Keep the safety instructions and warnings.
3. Follow all instructions.
4. Do not use this product near water.
5. Clean only with dry cloth.
6. Do not block any ventilation openings. Install in accordance with the instructions.
7. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
8. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
9. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
10. Only use attachments/accessories specified by the manufacturer.
11. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
12. Unplug this apparatus during lightning storms or when unused for long periods of time.
13. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
14. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
15. To completely disconnect this apparatus from the AC Mains, disconnect the power supply cord plug from the AC receptacle.
16. The mains plug of the power supply cord shall remain readily operable.
17. Do not expose batteries to excessive heat such as sunshine, fire or the like.
18. CAUTION for products that use batteries (including battery packs or battery installed): Do not dispose of batteries in a fire or expose them to excessive heat. Do not short-circuit, disassemble, or attempt to recharge any battery that is not intended to be recharged. Do not dispose of batteries in municipal waste. Dispose of batteries according to local regulations or return them to a battery collection point.
19. Where mains powered commercial electrical AC/DC accessories (power supplies, adapters, chargers, etc.) are used in any installation, ensure that the electrical rating of the accessory is not exceeded.
20. Equipment shall be connected to a MAINS socket outlet with a protective earthing connection.
21. Where a mains plug or an appliance coupler is used as the disconnect device, the disconnect device shall remain readily operable.
22. Caution should be taken when using plugs, socket-outlets and power outlets.
23. The apparatus shall not be exposed to water (dripping or splashing) and no objects filled with liquids, such as vases, shall be placed on the apparatus.
24. No naked flame sources, such as lighted candles, should be placed on the apparatus.
25. Attention should be drawn to the environmental aspects of battery disposal.
26. The use of this apparatus in tropical and/or moderate climates.
27. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
28. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
29. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
30. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
31. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
32. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
33. Caution should be taken when using plugs, socket-outlets and power outlets.
34. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
35. Unplug this apparatus during lightning storms or when unused for long periods of time.
36. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
37. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
38. No naked flame sources, such as lighted candles, should be placed on the apparatus.
39. Attention should be drawn to the environmental aspects of battery disposal.
40. The use of this apparatus in tropical and/or moderate climates.
41. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
42. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
43. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
44. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
45. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
46. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
47. Caution should be taken when using plugs, socket-outlets and power outlets.
48. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
49. Unplug this apparatus during lightning storms or when unused for long periods of time.
50. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
51. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
52. No naked flame sources, such as lighted candles, should be placed on the apparatus.
53. Attention should be drawn to the environmental aspects of battery disposal.
54. The use of this apparatus in tropical and/or moderate climates.
55. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
56. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
57. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
58. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
59. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
60. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
61. Caution should be taken when using plugs, socket-outlets and power outlets.
62. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
63. Unplug this apparatus during lightning storms or when unused for long periods of time.
64. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
65. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
66. No naked flame sources, such as lighted candles, should be placed on the apparatus.
67. Attention should be drawn to the environmental aspects of battery disposal.
68. The use of this apparatus in tropical and/or moderate climates.
69. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
70. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
71. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
72. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
73. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
74. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
75. Caution should be taken when using plugs, socket-outlets and power outlets.
76. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
77. Unplug this apparatus during lightning storms or when unused for long periods of time.
78. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
79. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
80. No naked flame sources, such as lighted candles, should be placed on the apparatus.
81. Attention should be drawn to the environmental aspects of battery disposal.
82. The use of this apparatus in tropical and/or moderate climates.
83. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
84. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
85. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
86. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
87. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
88. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
89. Caution should be taken when using plugs, socket-outlets and power outlets.
90. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
91. Unplug this apparatus during lightning storms or when unused for long periods of time.
92. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
93. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
94. No naked flame sources, such as lighted candles, should be placed on the apparatus.
95. Attention should be drawn to the environmental aspects of battery disposal.
96. The use of this apparatus in tropical and/or moderate climates.
97. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
98. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
99. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
100. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
101. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
102. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
103. Caution should be taken when using plugs, socket-outlets and power outlets.
104. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
105. Unplug this apparatus during lightning storms or when unused for long periods of time.
106. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
107. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
108. No naked flame sources, such as lighted candles, should be placed on the apparatus.
109. Attention should be drawn to the environmental aspects of battery disposal.
110. The use of this apparatus in tropical and/or moderate climates.
111. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
112. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
113. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
114. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
115. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
116. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
117. Caution should be taken when using plugs, socket-outlets and power outlets.
118. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
119. Unplug this apparatus during lightning storms or when unused for long periods of time.
120. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
121. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
122. No naked flame sources, such as lighted candles, should be placed on the apparatus.
123. Attention should be drawn to the environmental aspects of battery disposal.
124. The use of this apparatus in tropical and/or moderate climates.
125. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
126. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
127. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
128. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
129. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
130. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
131. Caution should be taken when using plugs, socket-outlets and power outlets.
132. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
133. Unplug this apparatus during lightning storms or when unused for long periods of time.
134. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
135. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
136. No naked flame sources, such as lighted candles, should be placed on the apparatus.
137. Attention should be drawn to the environmental aspects of battery disposal.
138. The use of this apparatus in tropical and/or moderate climates.
139. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
140. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
141. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
142. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
143. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
144. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
145. Caution should be taken when using plugs, socket-outlets and power outlets.
146. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
147. Unplug this apparatus during lightning storms or when unused for long periods of time.
148. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
149. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
150. No naked flame sources, such as lighted candles, should be placed on the apparatus.
151. Attention should be drawn to the environmental aspects of battery disposal.
152. The use of this apparatus in tropical and/or moderate climates.
153. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
154. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
155. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
156. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
157. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
158. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
159. Caution should be taken when using plugs, socket-outlets and power outlets.
160. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
161. Unplug this apparatus during lightning storms or when unused for long periods of time.
162. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
163. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
164. No naked flame sources, such as lighted candles, should be placed on the apparatus.
165. Attention should be drawn to the environmental aspects of battery disposal.
166. The use of this apparatus in tropical and/or moderate climates.
167. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
168. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
169. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
170. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
171. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
172. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
173. Caution should be taken when using plugs, socket-outlets and power outlets.
174. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
175. Unplug this apparatus during lightning storms or when unused for long periods of time.
176. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
177. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
178. No naked flame sources, such as lighted candles, should be placed on the apparatus.
179. Attention should be drawn to the environmental aspects of battery disposal.
180. The use of this apparatus in tropical and/or moderate climates.
181. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
182. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
183. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
184. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
185. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
186. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
187. Caution should be taken when using plugs, socket-outlets and power outlets.
188. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
189. Unplug this apparatus during lightning storms or when unused for long periods of time.
190. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
191. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
192. No naked flame sources, such as lighted candles, should be placed on the apparatus.
193. Attention should be drawn to the environmental aspects of battery disposal.
194. The use of this apparatus in tropical and/or moderate climates.
195. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
196. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
197. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
198. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
199. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
200. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
201. Caution should be taken when using plugs, socket-outlets and power outlets.
202. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
203. Unplug this apparatus during lightning storms or when unused for long periods of time.
204. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
205. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
206. No naked flame sources, such as lighted candles, should be placed on the apparatus.
207. Attention should be drawn to the environmental aspects of battery disposal.
208. The use of this apparatus in tropical and/or moderate climates.
209. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
210. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
211. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
212. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
213. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
214. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
215. Caution should be taken when using plugs, socket-outlets and power outlets.
216. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
217. Unplug this apparatus during lightning storms or when unused for long periods of time.
218. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
219. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
220. No naked flame sources, such as lighted candles, should be placed on the apparatus.
221. Attention should be drawn to the environmental aspects of battery disposal.
222. The use of this apparatus in tropical and/or moderate climates.
223. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
224. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
225. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
226. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
227. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
228. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
229. Caution should be taken when using plugs, socket-outlets and power outlets.
230. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
231. Unplug this apparatus during lightning storms or when unused for long periods of time.
232. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
233. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
234. No naked flame sources, such as lighted candles, should be placed on the apparatus.
235. Attention should be drawn to the environmental aspects of battery disposal.
236. The use of this apparatus in tropical and/or moderate climates.
237. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
238. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
239. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
240. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
241. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
242. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
243. Caution should be taken when using plugs, socket-outlets and power outlets.
244. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
245. Unplug this apparatus during lightning storms or when unused for long periods of time.
246. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
247. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
248. No naked flame sources, such as lighted candles, should be placed on the apparatus.
249. Attention should be drawn to the environmental aspects of battery disposal.
250. The use of this apparatus in tropical and/or moderate climates.
251. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
252. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
253. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
254. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
255. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
256. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
257. Caution should be taken when using plugs, socket-outlets and power outlets.
258. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
259. Unplug this apparatus during lightning storms or when unused for long periods of time.
260. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
261. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
262. No naked flame sources, such as lighted candles, should be placed on the apparatus.
263. Attention should be drawn to the environmental aspects of battery disposal.
264. The use of this apparatus in tropical and/or moderate climates.
265. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
266. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
267. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
268. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
269. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
270. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
271. Caution should be taken when using plugs, socket-outlets and power outlets.
272. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
273. Unplug this apparatus during lightning storms or when unused for long periods of time.
274. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
275. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
276. No naked flame sources, such as lighted candles, should be placed on the apparatus.
277. Attention should be drawn to the environmental aspects of battery disposal.
278. The use of this apparatus in tropical and/or moderate climates.
279. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
280. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
281. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
282. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
283. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
284. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
285. Caution should be taken when using plugs, socket-outlets and power outlets.
286. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
287. Unplug this apparatus during lightning storms or when unused for long periods of time.
288. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
289. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
290. No naked flame sources, such as lighted candles, should be placed on the apparatus.
291. Attention should be drawn to the environmental aspects of battery disposal.
292. The use of this apparatus in tropical and/or moderate climates.
293. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
294. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
295. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
296. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
297. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
298. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
299. Caution should be taken when using plugs, socket-outlets and power outlets.
300. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
301. Unplug this apparatus during lightning storms or when unused for long periods of time.
302. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
303. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
304. No naked flame sources, such as lighted candles, should be placed on the apparatus.
305. Attention should be drawn to the environmental aspects of battery disposal.
306. The use of this apparatus in tropical and/or moderate climates.
307. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
308. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
309. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
310. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
311. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
312. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
313. Caution should be taken when using plugs, socket-outlets and power outlets.
314. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
315. Unplug this apparatus during lightning storms or when unused for long periods of time.
316. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
317. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
318. No naked flame sources, such as lighted candles, should be placed on the apparatus.
319. Attention should be drawn to the environmental aspects of battery disposal.
320. The use of this apparatus in tropical and/or moderate climates.
321. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
322. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
323. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
324. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
325. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
326. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
327. Caution should be taken when using plugs, socket-outlets and power outlets.
328. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
329. Unplug this apparatus during lightning storms or when unused for long periods of time.
330. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
331. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
332. No naked flame sources, such as lighted candles, should be placed on the apparatus.
333. Attention should be drawn to the environmental aspects of battery disposal.
334. The use of this apparatus in tropical and/or moderate climates.
335. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
336. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. vases on shelves above the equipment.
337. To completely disconnect the apparatus from the AC Mains, the mains plug of the apparatus shall be disconnected from the mains socket outlet completely.
338. The mains plug of the apparatus shall not be obstructed OR should be easily accessed during intended use.
339. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.
340. Where the mains plug is used as the disconnect device, the disconnect device shall remain readily operable.
341. Caution should be taken when using plugs, socket-outlets and power outlets.
342. Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
343. Unplug this apparatus during lightning storms or when unused for long periods of time.
344. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
345. The apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
346. No naked flame sources, such as lighted candles, should be placed on the apparatus.
347. Attention should be drawn to the environmental aspects of battery disposal.
348. The use of this apparatus in tropical and/or moderate climates.
349. Wall or panel mounting is not possible as the apparatus requires adequate ventilation.
350. The apparatus is not to be exposed to dripping or splashing and that no objects filled with liquids are placed on the apparatus, e.g. v
