

Solder Board-Component View 13	 A photograph of a small, green, irregularly shaped printed circuit board (PCB) component. The component is positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters. The ruler markings range from 0 to 100 mm. The component itself is approximately 20 mm long and 10 mm wide. It features a white connector on one end and various electronic components, including a small black chip and several resistors.
Solder Board-Component View 14	 A photograph of a circular printed circuit board (PCB) component. The component is positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters. The ruler markings range from 0 to 50 mm. The component is approximately 20 mm in diameter. It features a white connector on one side and various electronic components, including a small black chip and several resistors. The component is labeled with "FENG-13-V1-0" and "8-1A-V1-0".

Solder Board-Component View 15	 A photograph showing a circular solder component, likely a BGA or similar surface-mount device, positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (10, 20, 30, 40, 50 mm). The component is centered between the 20 mm and 30 mm marks.
Solder Board-Component View 16	 A photograph showing a circular solder component, likely a BGA or similar surface-mount device, positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (10, 20, 30, 40, 50 mm). The component is centered between the 20 mm and 30 mm marks.
