Re: Application payment for FCC ID J9CTCU-1900, CN: EA95550

Dear Bette Taube,

I have contacted with Mr. Jay Moulton, Director of Regulation Group, regarding the payment for FCC ID J9CTCU-1900. He is sure that he did arrange the payment by Credit card last November. He has confirmed that FCC has received the payment (see his email below).

We are nearing the start of our beta test and the FCC certification is one of the last items waiting to be completed. Because of this, it would be significant to Qualcomm if FCC could expedite the certification procedure which has already taken more than three months.

If you have further question regarding this product, please let me know.

Thanks,

Fang Han
