Sound Quality:

Our Bluetooth receiver/transmitter features advanced decoders.Check the audio source if you notice sound quality issues.

Latency information:

1.Confirm your device supports low latency for reduced delay.

2.Bluetooth headphones generally have lower latency than speakers.

3.Obstacles and distance between devices can cause signal attenuation and latency.

Addressing Stuttering:

1.Check battery levels for low power.

2.Ensure devices are within 10 meters to prevent signal weakening

3.Be mindful of potential signalinterference in your environment.

Screen Management:

The LED screen will auto-turn off after 30 seconds of inactivity to conserve power.Press any button to re-illuminate the screen.

Warning

Before utilizing this product,we strongly advise you to meticulously review all safety instructions and warnings.Incorrect usage may result in damage to the product or its components.For both optimal functionality and your safety,kindly adhere to the subsequent guidelines:

1.Refrain from utilizing the product in damp or submerged settings.

2.Avoid usage in proximity to heaters or elevated-temperature conditions.

3.Steer clear of environments characterized by intense direct sunlight.

4.Ensure this product remains inaccessible to both children and pets.

5.Unauthorized disassembly of the product may render warranty terms void.

6.If the battery is inadvertently ingested or inserted into any bodily orifice, immediate medical attention is imperative.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
