Emergency-reset hole

If the computer stops responding and you cannot turn it off by pressing the power button, reset your computer:

- 1. Disconnect your computer from ac power.
- 2. Insert a straightened paper clip into the hole to cut off power supply temporarily.
- 3. Connect your computer to ac power and then turn on your computer.

Specifications

For detailed specifications of your computer, go to https://psref.lenovo.com.

USB specifications

Note: Depending on the model, some USB connectors might not be available on your computer.

Connector name	Description

- USB-C (3.2 Gen 1) connector
- USB-C (3.2 Gen 2) connector
- 7 Thunderbolt 3 connector (USB-C)
- Thunderbolt 4 connector (USB-C)

- Charge USB-C compatible devices with the output voltage and current of 5 V and 3 A.
- · Connect to an external display:
 - USB-C to VGA: up to 1920 x 1200 pixels, 60 Hz
 - USB-C to DP: up to 5120 x 3200 pixels, 60 Hz
- Connect to USB-C accessories to help expand your computer functionality. To purchase USB-C accessories, go to https://www.lenovo.com/accessories.

Statement on USB transfer rate

Depending on many factors such as the processing capability of the host and peripheral devices, file attributes, and other factors related to system configuration and operating environments, the actual transfer rate using the various USB connectors on this device will vary and will be slower than the data rate listed below for each corresponding device.

USB device	Data rate (Gbit/s)
3.2 Gen 1 / 3.1 Gen 1	5
3.2 Gen 2 / 3.1 Gen 2	10
3.2 Gen 2 × 2	20
Thunderbolt 3 connector (USB-C)	40
Thunderbolt 4 connector (USB-C)	40

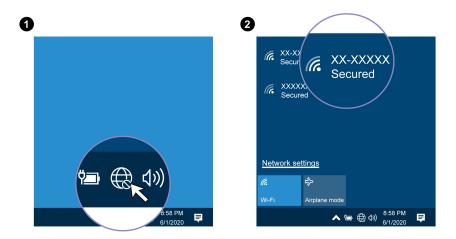

Chapter 2. Get started with your computer

Access networks

This section helps you connect to a wireless or wired network.

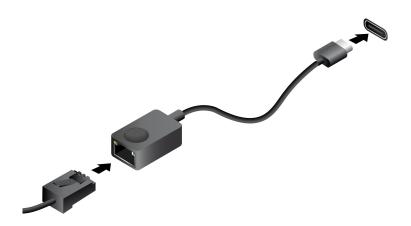

Connect to Wi-Fi networks

Click the network icon in the Windows® notification area, and then select a network for connection. Provide required information, if needed.

Connect to the wired Ethernet

To connect your computer to a local network, you need a Lenovo USB-C to Ethernet Adapter. Lenovo USB-C to Ethernet Adapter is available as an option and shipped with some computer models. You can purchase one from Lenovo at https://www.lenovo.com/accessories.

Connect to a cellular network (for selected models)

If your computer has a wireless wide area network (WAN) card and a nano-SIM card installed, you can connect to a cellular data network and get online everywhere.

Note: The cellular service is provided by authorized mobile service carriers in some countries or regions. You must have a cellular plan from a service carrier to connect to the cellular network.

To establish a cellular connection:

- 1. Turn off the computer.
- 2. Locate the nano-SIM card slot and insert the nano-SIM card as shown. Note the orientation of the card and ensure that it is seated correctly.

- 3. Turn on the computer.
- 4. Click the network icon, and then select the cellular network icon all from the list. Provide required information, if needed.

Turn on the Airplane mode

When the Airplane mode is enabled, all wireless features are disabled.

- 1. Click the action center icon in the Windows notification area.
- 2. Click Airplane mode to turn on the Airplane mode.

Interact with your computer

Your computer provides you various ways to navigate the screen.

Use the keyboard shortcuts

The special keys on the keyboard help you work more effectively.

_	Invoke the special function printed as an icon on each key or standard function of F1-F12 function keys.
Esc FnLock	FnLock indicator on: standard function
	FnLock indicator off: special function
된 * F1	Enable / disable speakers
4 — F2	Decrease volume

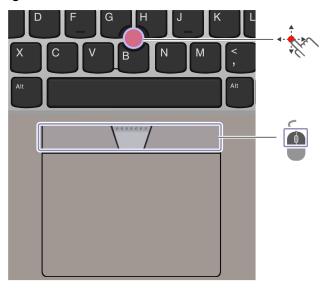

4+ F3	Increase volume
× *	Enable / disable microphones

;☼+ F6	Brighten display
E 77	Manage external displays
* / ₂ F8	Enable / disable wireless
D F9	Open / collapse notification center
	Answer incoming calls
F10	This function only works with some apps, such as Skype for Business 2016 and Microsoft Teams 1.0.
	By default, the function works with Skype for Business 2016. You can change the default setting on the Vantage app.
	Decline incoming calls
	This function only works with some apps, such as Skype for Business 2016 and Microsoft Teams 1.0.
FII	By default, the function works with Skype for Business 2016. You can change the default setting on the Vantage app.
	Note: You can also press F11 to hang up ongoing calls on Skype for Business 2016.
☆ F12	Customize the function of this key on the Vantage app.
Fn PrtSc	Open Snipping Tool
Fn +	Toggle keyboard backlight
Fn B	Break operation
Fn P	Pause operation
Fn K	Scroll contents
Fn S	Send system request

Fn \$ 4	Enter sleep mode
	To wake up the computer, press Fn or the power button.
Fn +	Go to beginning
Fn +	Go to end

Use the TrackPoint pointing device

The TrackPoint pointing device enables you to perform all the functions of a traditional mouse, such as pointing, clicking, and scrolling.

Use the TrackPoint pointing device

Use your finger to apply pressure to the pointing-stick nonslip cap in any direction parallel to the keyboard. The pointer on the screen moves accordingly. The higher the pressure applied, the faster the pointer moves.

TrackPoint buttons

The left-click button and right-click button correspond to the left and right buttons on a traditional mouse. Press and hold the dotted middle button while using your finger to applying pressure to the pointing stick in the vertical or horizontal direction. Then, you can scroll through the document, Web site, or apps.

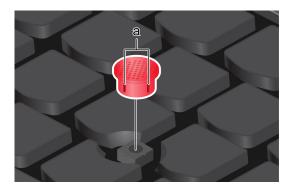

Disable the TrackPoint pointing device

The TrackPoint pointing device is active by default. To disable the device:

- 1. Open the **Start** menu, and then click **Settings** → **Devices** → **Mouse**.
- 2. Follow the on-screen instructions to disable TrackPoint.

Replace the pointing-stick nonslip cap

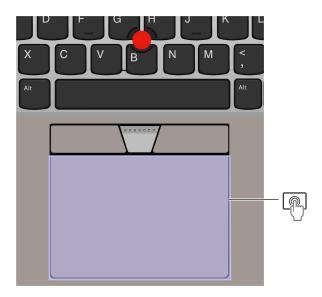

Note: Ensure that the new cap has grooves a.

Use the trackpad

The entire trackpad surface is sensitive to finger touch and movement. You can use the trackpad to perform all the pointing, clicking, and scrolling functions of a traditional mouse.

Use the trackpad

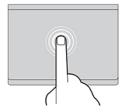

Click zone

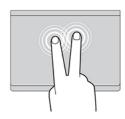

Press to select or open an item.

You also can tap anywhere on the surface of the trackpad with one finger to perform the left-click action.

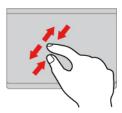

Use the touch gestures

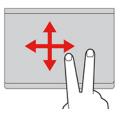

Tap once to select or open an item.

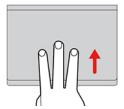

Tap twice quickly to display a shortcut menu.

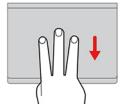

Two-finger zoom in or zoom out.

Scroll through items.

Open the task view to see all open windows.

Show the desktop.

Notes:

- When using two or more fingers, ensure that you position your fingers slightly apart.
- Some gestures are not available if the last action was done from the TrackPoint pointing device.
- Some gestures are only available when you are using certain apps.
- If the trackpad surface is stained with oil, turn off the computer first. Then, gently wipe the trackpad surface with a soft and lint-free cloth moistened with lukewarm water or computer cleaner.

For more gestures, see the help information of the pointing device.

Disable the trackpad

The trackpad is active by default. To disable the device:

- 1. Open the **Start** menu, and then click **Settings** → **Devices** → **Touchpad**.
- 2. In the Touchpad section, turn off the Touchpad control.

Use the touch screen

You can navigate the screen with simple touch gestures.

Note: Some gestures might not be available when you are using certain apps.

Tap once to single click

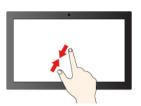

Tap twice quickly to double-click

Tap and hold to right-click

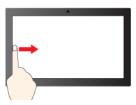

Slide to scroll through items

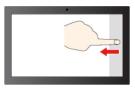

Zoom out

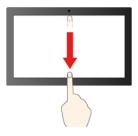

Zoom in

Swipe from the left: view all open windows

Swipe from the right: open action center

Swipe downwards shortly: show title bar

Drag

Swipe downwards: close the current app

Maintenance tips:

• Turn off the computer before cleaning the touch screen.

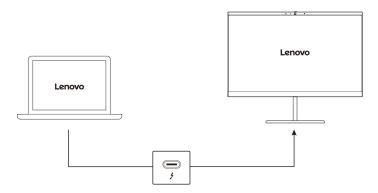

- · Use a dry, soft, and lint-free cloth or a piece of absorbent cotton to remove fingerprints or dust from the touch screen. Do not apply solvents to the cloth.
- The touch screen is a glass panel covered with a plastic film. Do not apply pressure or place any metallic object on the screen, which might damage the touch panel or cause it to malfunction.
- Do not use fingernails, gloved fingers, or inanimate objects for input on the screen.
- Regularly calibrate the accuracy of the finger input to avoid a discrepancy.

Connect to an external display

Connect your computer to a projector or a monitor to give presentations or expand your workspace.

Connect to a wired display

- 1. Connect the external display to the Thunderbolt 4 connector (USB-C) on your computer.
- 2. Connect the external display to an electrical outlet.
- 3. Turn on the external display.

If your computer cannot detect the external display, right-click a blank area on the desktop, and then click Display settings → Detect.

Supported resolution

When you connect the external display to the Thunderbolt 4 connector (USB-C), the supported maximum resolution is up to 5120 x 3200 pixels, 60 Hz.

Connect to a wireless display

To use a wireless display, ensure that both your computer and the external display support the Miracast® feature.

and then select a wireless display to connect with.

Set the display mode

and then select a display mode of your preference.

Change display settings

- 1. Right-click a blank area on the desktop and select **Display settings**.
- 2. Select the display that you want to configure.

3. Change display settings of your preference.

You can change the settings for both the computer display and the external display. For example, you can define which one is the main display and which one is the secondary display. You also can change the resolution and orientation.

Get to know YOGA modes

Rotate the display to switch among different YOGA modes according to your preference. The keyboard and the pointing devices are automatically disabled in the stand mode, tent mode, and tablet mode. Use the touch screen to control your computer instead.

Attention: Do not rotate the computer display with too much force, or apply too much force to the upperright or upper-left corner of the computer display. Otherwise the computer display or hinges might get damaged.
