Application No.: <u>HM155920</u>

Date: 27 January 2006

FCC ID: SVDJP-83413

## **Circuit Description**

The <u>49.86</u>MHz crystal oscillator drives the base of <u>Q4</u> the final/buffer amplifier. The modulation provided by <u>Mic</u>. The output of <u>Q4</u> has the matching network consisting of <u>L1</u> and <u>C7</u> that limit the harmonic content and effect the proper coupling of the antenna to the output stage.

Antenna, Ground and Power Source

The antenna consists of a <u>10cm</u> long telescoping chrome over brass tubing. There is no external ground connection. The ground is only that of the printed circuit board. Electric current is supplied by a <u>9 Volt ("6F22" size battery x 1)</u> primary battery.

## **Operation Descriptions**

The transmitter is a <u>toy walkie talkie</u> operating at <u>49.86</u>MHz band. The transmitter is powered by a <u>9Volt</u> battery (<u>6F22</u>) and the transmitting frequency is crystal controlled. The operation is achieved by different combinations of form amplitude modulating signal on the <u>49.86MHz</u> carrier frequency.

Remarks: The transmitter is a 1 <u>Button</u> transmitter. The EUT continues to transmit while <u>Button</u> is being pressed. It is <u>Voice</u> transmitter, Modulation by<u>Microphone</u>; and type is <u>Amplitude</u> modulation.
