1. Power modules

The 2.4G Wireless Mouse-Dongle can be powered by USB port, and the DC-DC is responsible for converting 5V to 3.3V to MCU(8513) and other modules.

2.RF module;

The RFmodule-8513 Support Frequency range: 2.4GHz(2405-2478MHz), Crystal oscillator 16MHz.

The main chip of this product is MCU(8513), connects and powers through UBS2.0 interface and PC or other apparatuses to do data transmit and receive.

Modulation Techning:GFSK
Maximum E-Field Strength:80.94dBuV/@3M
