Power output listed is ERP for Part 22 and EIRP for Part 24. For AMPS mode operation, units produced must not exceed 389 mW conducted output, as tested for this filing, for satisfying RF exposure requirement. SAR compliance for body-worn operating configurations is limited to the specific configurations, including a specific belt-clip, tested for this filing. Other belt-clips, holsters or similar accessories used with this device for body-worn operations must not contain any metallic component in the assembly and must provide at least 2.5 cm separation between the device, including its antenna, and the user's body. End-users must be informed of the body-worn operating requirements for satisfying RF exposure compliance.

BC: The output power is continuously variable from the value listed in this entry to 5%-10% of the value listed.
