FCC Compliance Statements

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Explanation of charging function

Charging port

Charging cable

Low power will make the sound of the product small, need to connect the charging cable to the charging hole to charge. Note: it cannot play normally during charging. It can be played normally only after the charging cable is removed from the power supply.

3.7V 1200mAh lithium battery is used, red light shines through the small round hole when charging, and the light goes out when full (charging time is about 7-10 minutes).

- Replacement of a battery with an incorrect type that can defeat a safeguard (for example in the case of some lithium battery types);
- Disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, that can result in an explosion;
- Leaving a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas;
- And a battery subjected to extremely low air pressure that may result in an explosion or the leakage of flammable liquid or gas.

Warm reminder

If no operation is performed for more than 10 minutes in the power-on state, a hibernation announcement will be played to enter the intelligent power-saving mode. Press any button to wake up.
