## **ATTESTATION STATEMENT**

### **(Declaration on equivalent Models)**

TO WHOM IT MAY CONCERN

We, Trackunit Aps declare on our sole responsibility that the models

#### **TU600-21, TU600-22**

are equal in hardware and software to the **tested model TU600-25** with FCC ID: ZMF-TU600B to an extend not affecting the PCB layout with antennas, the Quectel BG95-M3 cellular module, the Silabs BGM210P22A Bluetooth LE module and the Quectel L76-LB GPS/Glonass receiver.

The only differences between the model TU600-25 and the TU600-21 / TU600-22 are the baseband input/output interfaces and I/O ports:

- *I-wire/5V DC out interfaces:* *not mounted.*
- *I/O ports:* *not mounted.*
- *CAN bus interface:* *not mounted.*

All TU600B family models are externally powered in the range from 12V DC to 48 V DC from a vehicles or machinery battery source.

We attest that above variant changes are not relevant for the RF behaviour subject to the regulatory rules according to FCC part 2.1093, part 15.247, part 22, part 24, part 27 and part 90.

Therefore, the CTC Advanced GmbH test reports for model TU600-25 are for applicable for the models TU600-21 and TU600-22.

If you have any questions, please feel free to contact us at the address shown below
