Left Side

The image displays two views of a Blackline Safety battery, a large, rectangular, black unit with a textured surface.

Left View (Front): The front of the battery features a small, rectangular label at the top center with technical specifications and a QR code. Below this is a large, white rectangular label with a red header that reads "WARNING". The text on the label states: "Do not charge battery below 0°C (32°F) or above 45°C (113°F). Only use Blackline Safety approved charger." The battery has a black handle on the left side and a black latch on the right side.

Right View (Back): The back of the battery shows a black handle at the top center. Below the handle is a red rectangular label with a white header that reads "Fully charge before first use." followed by the same instruction in French, Spanish, German, Italian, Dutch, and Portuguese. Below the text is a QR code. At the bottom of the back panel, the "blackline safety" logo is printed in white and red.
