1 Overview

1.1 Introduction

6223N-SRD is a highly integrated and excellent performance Wireless LAN (WLAN) and BT. It provides SDIO interface for Wi-Fi to connect with host processor and high speed UART interface for BT. High-speed wireless connection up to 150 Mbps and Bluetooth can support BT2.1+EDR/BT3.0 and BT4.2. It can be easily manufactured on SMT process.

This WLAN Module design is based on Realtek RTL8723DS-CG QFN48 4.4X4.4mm(Realtek).It combines a MAC, a 1T1R capable baseband, and RF in a single chip. It is designed to provide excellent performance with low power Consumption and enhance the advantages of robust system and cost-effective.

6223N-SRD integrates whole Wi-Fi/BT function blocks into a chip, such as SDIO/UART, MAC, BB, AFE, RFE, PA, EEPROM and LDO/SWR, except fewer passive components remained on PCB.

This compact module is a total solution for a combination of Wi-Fi + BT technologies. The module is specifically developed for Smart phones and Portable devices.

1.2 Features

- Operate at ISM frequency bands (2.4GHz)
- CMOS MAC, Baseband PHY, and RF in a single chip for 802.11b/g/n compatible WLAN
- Wi-Fi 1 transmitter and 1 receiver allow data rates supporting up to 150 Mbps downstream and 150 Mbps upstream PHY rates
- SDIO for Wi-Fi and UART for Bluetooth
- Fully Qualified for Bluetooth 2.1+EDR specification including both 2Mbps and 3Mbps modulation mode
- Fully qualified for Bluetooth 3.0
- Fully qualified for Bluetooth 4.2 Dual mode
- Full_speed Bluetooth operation with Piconet and Scatternet support

1.3 General Specification

Model Name	6223N-SRD
Product Description	Support Wi-Fi/BT functionalities
Dimension	L x W x T: 23 x 21 x 4.8 (typical) mm
BT Interface	Support UART
Wi-Fi Interface	Support SDIO 2.0
Operating temperature	0°C to 70°C
Storage temperature	-40°~125°

1.4 Recommended Operating Rating

	Min.	Тур.	Max.	Unit
Operating Temperature	0	25	70	deg.C
VBAT	3.0	3.3	3.6	V
VDDIO	1.7	1.8 or 3.3	3.6	V

2 General Specification

2.1 Wi-Fi RF Specifications

Feature	Description	
WLAN Standard	IEEE 802.11b/g/n, Wi-Fi compliant	
Frequency Range	2412MHz-2462MHz	
Channels	2.4GHz:CH1~CH11	
	802.11b /11Mbps:17dBm \pm 1.5dB@EVM<=-10dB	
Output Power	802.11g /54Mbps:14dBm \pm 1.5dB@EVM<=-25dB	
	802.11n/MCS7@HT20:13dBm ± 1.5dB@EVM<=-28dB	
	802.11n/MCS7@HT40:13dBm \pm 1.5dB@EVM<=-28dB	
Spectrum Mask	IEEE compliant	
Freq. Tolerance	\pm 15 ppm	
Receive Sensitivity	802.11h/11Mhnc: DED < 76	
(11b) @8% PER		
Receive Sensitivity	802.11a/54Mbas: DED < 65	
(11g) @10% PER		
Receive Sensitivity		
(11n,20MHz) @10% PER		
Receive Sensitivity	802 11n/MCS7@HT40 [.] PER@≤-61	
(11n,40MHz) @10% PER	002.1111/1VICS/@H140.PER@≈-01	

2.2 Bluetooth Specification

Feature	Descriptio	n	
General Specification			
Bluetooth Standard	Bluetooth	V4.2 of 1, 2 and 3 N	Vlbps.
Host Interface	UART		
Frequency Band	2402 MHz	~ 2480 MHz	
Number of Channels	79 channe	ls	
Modulation	GFSK, π/4	-DQPSK and 8DP	SK
RF Specification			
	Min.	Typical.	Max.
Output Power (Class 1.5)		6dBm	
Output Power (Class 2)		2dBm	
Sensitivity @ BER=0.1%		_86dBm	
for GFSK (1Mbps)		-oodbiii	
Sensitivity @ BER=0.01%		_86dBm	
for π/4-DQPSK (2Mbps)		-ooubiii	
Sensitivity @ BER=0.01%		-80dBm	
for 8DPSK (3Mbps)		-ooubiii	
	GFSK (1M	bps): -20dBm	
Maximum Input Level	π/4-DQPS	K (2Mbps) : -20dBi	n
	8DPSK (3Mbps) : -20dBm		
Sensitive @PER=30.8% FOR BLE		-90dBm

6.1 SDIO Pin Description

The module supports SDIO version 2.0 for all 1.8V 4-bit UHSI speeds: SDR12(25 Mbps), and SDR25(50Mbps) in addition to the 3.3V default speed(25MHz) and high speed (50 MHz). It has the ability to stop the SDIO clock and map the interrupt signal into a GPIO pin. This 'out-of-band' interrupt signal notifies the host when the WLAN device wants to turn on the SDIO interface. The ability to force the control of the gated clocks from within the WLAN chip is also provided.

6.4 UART Interface Characteristics

The RTL8723DS UART interface is a standard 4-wire interface with RX,TX,CTS and RTS. The interface supports the Bluetooth 2.0 UART HCI H4 and H5 specifications. The default baud rate is 115.2K baud. In order to support high and low speed baud rate,the RTL8723DS provides multiple UART clocks.

6.5 UART Interface Power-on Sequence

10 Environmental Requirements

10.1 Recommended Reflow Profile

Referred to IPC/JEDEC standard. Peak Temperature : <250°C

Number of Times : \leq 2 times

10.2 Patch Wi-Fi/BT modules installed before the notice

Wi-Fi/BT module installed note:

1. Please press 1 : 1 and then expand outward proportion to 0.7 mm, 0.12 mm thickness When open a stencil.

2. Take and use the WIFI/BT module, please insure the electrostatic protective measures.

3. Reflow soldering temperature should be according to the customer the main size of the products, such as the temperature set at 250 + 5 $^{\circ}$ C for the MID motherboard.

About the module packaging, storage and use of matters needing attention are as follows:

1. The module of the reel and storage life of vacuum packing: 1). Shelf life: 8 months, storage environment conditions: temperature in: < 40 \degree C, relative humidity: < 90% r.h.

2. The module vacuum packing once opened, time limit of the assembly:

Card:1) check the humidity display value should be less than 30% (in blue), such as: $30\% \sim 40\%$ (pink), or greater than 40% (red) the module have been moisture absorption.

- 2.) factory environmental temperature humidity control: \leq -30 °C, \leq 60% r.h..
- 3). Once opened, the workshop the preservation of life for 168 hours.
- 3. Once opened, such as when not used up within 168 hours:
- 1). The module must be again to remove the module moisture absorption.
- 2). The baking temperature: 125 °C, 8 hours.
- 3). After baking, put the right amount of desiccant to seal packages.

FCC Statement

FCC standards: FCC CFR Title 47 Part 15 Subpart C Section 15.247

Integral antenna with antenna gain 2dBi

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

The modular can be installed or integrated in mobile or fix devices only. This modular cannot be installed in any portable device if without further certify for example C2PC with SAR. This modular complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. This modular must be installed and operated with a minimum distance of 20 cm between the radiator and user body.

If the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: 2AATL-6223N-SRD Or Contains FCC ID: 2AATL-6223N-SRD"

When the module is installed inside another device, the user manual of the host must contain below warning statements;

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference;

(2) This device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The devices must be installed and used in strict accordance with the manufacturer's instructions as described in the user documentation that comes with the product.

Any company of the host device which install this modular with modular approval should perform the test of radiated & conducted emission and spurious emission, etc. according to FCC part 15C : 15.247 and 15.209 & 15.207 ,15B Class B requirement, Only if the test result comply with FCC part 15C : 15.247 and 15.209 & 15.207 ,15B Class B requirement, then the host can be sold legally.
