

RF TEST REPORT

Product Name: PeriPage Tattoo Transfer Printer

Model Name: ALD-P920, P92, ALD-P910, P91

FCC ID: 2ASPY-ALD-P920

Issued For : Xiamen Ilead Tek Co., Ltd.

Room 01,Unit 2101, No.50 Chengyi North Street,Software Park Phase III, Xiamen, Fujian, China

Issued By : Shenzhen LGT Test Service Co., Ltd.

Room 205, Building 13, Zone B, Zhenxiong Industrial Park, No.177, Renmin West Road, Jinsha, Kengzi Street, Pingshan District, Shenzhen, Guangdong, China

| Report Number: | LGT24L006HA02 |
|-----------------------|-------------------------------|
| Sample Received Date: | Dec. 03, 2024 |
| Date of Test: | Dec. 03, 2024 ~ Dec. 18, 2024 |
| Date of Issue: | Dec. 18, 2024 |

The test report is effective only with both signature and specialized stamp. This report shall not be reproduced except in full without the written approval of the Laboratory. The results in this report only apply to the tested sample.

| Accreditation Certificate | FCC Registration No.: 746540 | | | |
| | CAB ID: CN0136 | | | |

2. FCC 47CFR §2.1091 REQUIREMENT

2.1 TEST STANDARDS

The limit for Maximum Permissible Exposure (MPE) specified in FCC 1.1310 is followed. The gain of the antennas used in the product is extracted from the Antenna data sheets provided and also the maximum total power input to the antenna is measured. Through the Friis transmission formula and the maximum gain of the antenna, we can calculate the distance, away from the product, where the limit of MPE is reached.

Although the Friis Transmission formula is far field assumption, the calculated result of that is an over-prediction for near field power density. It is taken as worst case to specify the safety range.

2.2 LIMIT

According to FCC 1.1310: The criteria listed in the following table shall be used to evaluate the environmental impact of the human exposure to radio-frequency (RF) radiation as specified in 1.1207 (b).

1.1307 (b)

Limits for Maximum Permissible Exposure (MPE)

| | | - | |
|------------------------|---------------------------|----------------|---------------|
| Frequency Range | Electric Field | Magnetic Field | Power Density |
| (MHz) | Strength (V/m) | Strength (A/m) | (mW/cm²) |
| Limits for Occupationa | I / controlled Exposures | | |
| 0.3-3.0 | 614 | 1.63 | *(100) |
| 3.0-30 | 1842/f | 4.89/f | *(900/f²) |
| 30-300 | 61.4 | 0.163 | 1.0 |
| 300 - 1500 | | | F/300 |
| 1500 – 100000 | | | 5.0 |
| Limits for General pop | ulation / Uncontrolled Ex | posure | |
| 0.3-1.34 | 614 | 1.63 | *(100) |
| 1.34-30 | 824/f | 2.19/f | *(180/f²) |
| 30-300 | 27.5 | 0.073 | 0.2 |
| 300 - 1500 | | | F/1500 |
| 1500 – 100000 | | | 1.0 |
| | | | |

F= Frequency in MHz

* = Plane-wave equivalent power density.

Friss Formula

Friss Transmission Formula: $Pd = (Pout * G) / (4*pi*r^2)$

Where

 $Pd = power density in mW/cm^{2}$

Pout = output power to antenna in mW

G = gain of antenna in linear scale

Pi = 3.1416

R = Distance between observation point and the center of radiator in cm

If we know the maximum gain of the antenna and the total output power to the antenna, through calculation, we will know MPE value at distance 20cm.

2.3 EUT OPERATION CONDITION

EUT was enabled to transmit and receive at lowest, middle and highest channels.

2.4 CLASSIFICATION

The antenna of this product, under normal use condition, is at least 20cm away from the body of the user. Warning statement to the user for keeping at least 20cm or more separation distance from the antenna should be included in the User manual. So, this device is classified as Mobile device.

2.5 TEST RESULT

Turn up Result

| Mode | Turn up Power |
|--------------|---------------|
| BT-GFSK | -7.5±1dBm |
| BT-π/4-DQPSK | -7.5±1dBm |
| BT-8DPSK | -7.5±1dBm |
| BLE-GFSK | -9.5±1dBm |

The MPE result of worst mode:

| RF Function | Frequency (MHz) | Max Turn up Power (dBm) | Max Turn up Power (mW) | ANT Gain (dBi) | ANT Gain (gain of antenna in linear scale) | Power Density (mW/cm²) | Limit (mW/cm²) | Ratio | Result |
|----------------|--------------------|----------------------------------|------------------------------------|----------------------|---|------------------------------|-------------------|--------|--------|
| BLE | 2440 | -8.50 | 0.14 | 3.14 | 2.06 | 0.0001 | 1 | 0.0001 | Pass |
| BT | 2441 | -6.50 | 0.22 | 3.14 | 2.06 | 0.0001 | 1 | 0.0001 | Pass |

Note:

1. The Maximum Power Density is less than the limit, complies with the exemption requirements.
