Federal Communications Commission  
Equipment Approval Services  
P.O. Box 358315  
Pittsburgh, PA 15251-5315

Gentlemen:

Pursuant to our discussions with Mr. Bruce A. Romano, Associate Chief/Legal Counsel for the Federal Communications Commission (FCC) Office of Engineering and Technology (OET), we are submitting an Application for Equipment Authorization on FCC Form 731 using the OET's online filing system. This application, filed in accordance with FCC Part 2.933 (a), requests a change in the FCC identifier for a transceiver, the VHF-700A. The original FCC identifier as granted by the FCC on September 7, 1994 is AJKPN822-0693. We are requesting that a new FCC identifier be granted for this equipment under identifier AJK9URPN822-0693. The change is requested to add the Manufacturer Code to the FCC identifier. While not required by FCC Rules, the Manufacturer Code was added to the FCC identifier because of personnel confusion over FCC Rule changes that eliminated the requirement for inserting the Code. As a result, the Manufacturer Code has continued to be applied to this product.

We are submitting a complete copy of the original filing documents from 1994 since we are informed by Mr. Ramono that the original filing is no longer available to the OET. The statement required under FCC Part 2.933(b) is also enclosed as Exhibit 1.

In accordance with FCC Part 87.147(d), a complete copy of this application is being forwarded to the Federal Aviation Administration (FAA). A copy to the transmittal letter to the FAA is enclosed as Exhibit 2.

Your early consideration of this Application is respectfully requested. Please address all inquiries to John Giffit of this office at 703.516.8213.

Respectfully submitted,

Linda C. Sadler  
Director, Federal Affairs  
703.516.8225
