| <p><b>Solder<br/>Board-Component<br/>View 11</b></p> |  A photograph of a small green printed circuit board (PCB) component, likely a surface-mount device, positioned on a blue textured background. The component is rectangular with two gold-colored pins extending from its ends. It is placed next to a black L-shaped ruler with white markings. The vertical ruler shows measurements from 0 to 90 mm, and the horizontal ruler shows measurements from 0 to 100 mm. The component is located approximately at the 10 mm mark on the vertical ruler and the 30 mm mark on the horizontal ruler. |
| <p><b>Solder<br/>Board-Component<br/>View 12</b></p> |  A photograph of the same small green PCB component from a different angle, showing its top surface. The component is rectangular with various electronic components visible on its surface, including a small black chip and several resistors. It is placed next to the same black L-shaped ruler with white markings. The component is located approximately at the 10 mm mark on the vertical ruler and the 30 mm mark on the horizontal ruler.                                                                                             |

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| <p>Antenna View 1</p> |  <p>A photograph of an RFID antenna module. The antenna is a green printed circuit board (PCB) with a large, silver, rectangular metal patch antenna. The PCB is mounted on a blue textured surface. A black ruler with white markings is placed vertically to the left of the antenna, showing measurements in millimeters. A red box highlights the antenna patch, and a red line points from the label "RFID Antenna" to it.</p>                                               |
| <p>Antenna View 2</p> |  <p>A photograph of a BT antenna module. The antenna is a green printed circuit board (PCB) with various electronic components, including a microcontroller, capacitors, and a small antenna patch. The PCB is mounted on a blue textured surface. A black ruler with white markings is placed vertically to the left of the antenna, showing measurements in millimeters. A red box highlights the antenna patch, and a red line points from the label "BT Antenna" to it.</p> |
