## System Selection

☒ Mac mode ☐ Win mode

## RGB Light Bar

☒ Power 0%~20%  
☐ Power 21%~50%

☐ Power 51%~80%  
☒ Power 81%~100%

☒ Caps Lock  
☐ Wired mode  
☐ Bluetooth mode  
☐ 2.4G mode

☒ Win mode  
☐ Mac mode  
☐ Sleep mode On  
☒ Sleep mode Off

## Connection Mode Selection

☐ Wireless mode  
☒ Wired mode  
☐ Power Off

\* In the wired mode, it is necessary to use a data cable to connect with the device.

## Wireless Device Connection

FN + ↑ / ↓ / ← / → : Disabled / Disabled 2 / Disabled 3 / Disabled 4

Short press to switch between devices; long press 8 seconds to enter the pairing mode. Plug the 2.4G receiver into your computer and/or pressing FN + 4.

## Backlight Settings

FN + ↑/↓ Brightness + -

FN + ←/→ Backlight speed - +

FN + ↑ Backlight effect switching

FN + ↓ Backlight color switching

## Sidelight Settings

06

FN+M+Up Sidelight brightness +

FN+M+Down Sidelight attach switching

FN+M+Left Sidelight color switching

FN+M+Right Sidelight speed - +

## Nameplate LED

07

FN+N+Up Nameplate LED brightness +

FN+N+Down Nameplate LED attach switching

FN+N+Left Nameplate LED color switching

FN+N+Right Nameplate LED speed - +

## Sleep Mode Setting

08

FN+P Turn the Sleep mode on or off

\* If there is no mouse on the keyboard, it will turn off the light and enter the sleep mode after 60 minutes.

## The Screenshot Shortcut

09

VIA

Founded by a small team of passionate dreamers, NuPhy has always been at war with boredom and uninspiring designs. 創始人NuPhy Studio是一個充滿熱情的獨立工作室。我們相信，無論是哪一種產品的那一天，這個工作當初不同凡響。JA「NuPhy Studio」は、素直な仲間たちが作り出した存在であり、私たちが面白い製品を作りたいという思いが詰まっています。このスタジオは今も大きく成長しています。00 NuPhy Studio! 일상의 지루했던 사물을 좀 더 생동감 있게 만듭니다. 우리가 재미있고 유용한 제품을 만들 때, 그 스튜디오는 디자인을 내내 기억할 것입니다.

## FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

## **IC Warning**

This device complies with Industry Canada's licence-exempt RSSs. Operation is subject to the following two conditions:

- (1) This device may not cause interference; and
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

The device has been evaluated to meet general RF exposure requirement.  
The device can be used in portable exposure condition without restriction.

Cet appareil est conforme aux CNR exemptes de licence d'Industrie Canada .  
Son fonctionnement est soumis aux deux conditions suivantes :

- ( 1 ) Ce dispositif ne peut causer d'interférences ; et
- ( 2 ) Ce dispositif doit accepter toute interférence , y compris les interférences qui peuvent causer un mauvais fonctionnement de l'appareil.

Le dispositif a été conçu pour répondre à la demande générale de radioexposition.
