RE: Martec Access Products, Inc.

FCC ID: JCQ993

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) FYI, The label frequency appears as ".303". This may or may not be intentional.
- 2) The test report states on page 4 "the transmitter was activated using the lock/unlock button, with a special wooden clamp...". Please explain as this product does not appear to be activated in this manner.
- 3) Please show compliance with the device shutting off in < 5 seconds after the alarm condition is over (vibration has stopped).

Timothy R. Johnson
Examining Engineer
