Subject: Application for Class 2 Permissive Change to FCC Authorized Transceiver with
FCC ID: AZ489FT4963

Dear Sir/Madam,

A permissive change is requested for the subject transceiver which is marketed in the United States and elsewhere.

A. DESCRIPTION OF PRODUCT CHANGES:

Qualify Multek as 2nd source PCB (original supplier is WUS) to ensure continuity of supply.
There is some minor differences on the dielectric core thickness.

B. PERFORMANCE DIFFERENCES:

Degradation was observed on EME as when compared to the previous filing and the data continues to be compliant to the FCC limits. EMC Part 15B was assessed and remains compliant.

C. CONCLUSION:

These radios continued to meet all FCC emissions requirements for which authorization was granted. However, EME has degraded compared to those originally reported, thus this change does meet requirements of a Class-2 Permissive Change.

Sincerely,

Arine Lee
FCC/IC Certification Manager
