TROUBLESHOOTING

The laptop is not turning on

- The battery may have depleted. Charge for at least an hour before attempting to turn the laptop back on.
- Make note if any lights turn on, or if any internal components like fans turn on.

> **Notes:**
> If in storage for extended periods of time, it is recommended to periodically charge the laptop to keep the battery capacity high, as batteries naturally deteriorate and eventually die over time.

The laptop is not charging

Inspect the laptop charging port and power adapter for any physical damage. If damaged, stop use immediately and contact for assistance.

The laptop is not connecting to Wi-Fi

- Restart your modem/router, or both if you have separate units.
- Reconnect any range extenders that may be in use.
- Restart the laptop.
- Move the laptop closer to the modem/router.
- Double-check that the Wi-Fi password is correct.
- If you can connect to Wi-Fi but it's running very slowly or has a weak signal, disconnect the laptop from the Wi-Fi network and reconnect.

The laptop screen becomes dark when the power adapter is unplugged

This will be occurring due to your power plan settings. Go to the Control Panel and change your power plan settings to allow the screen to remain on when the laptop is not charging/unplugged.

Forgotten password

There are several options to reset a Microsoft password.

- Using a password reset disc via USB.
- Resetting the Microsoft account password online with another device.
- Resetting Windows 11 back to the factory default. Be aware that doing this will delete all personal data stored on the laptop.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

· Reorient or relocate the receiving antenna.
· Increase the separation between the equipment and receiver.
