Application download

Search "iWOWNfit" on App Store, Google Play, or scan the QR code below to download the App and install it.

Account set-up: Open the "iWOWNfit" App. Log in if you have an account, or register a new account.

Pairing

Keep your phone with Bluetooth and on-line for this step. Log in the App iWOWNfit, and according instructions to connect the bracelet with App.

After a successful connection, time and motion data will synchronize, Sleep monitoring, Message push, Call remind will turn on.

Notice: When you need to replace the phone connection smartband, it is need to re- paired. With the smartband off ,long press the screen to vibrate three times.

Charging

Please place the Magnetic Charging Cable on the back of the smartband (as shown in the figure). Plug it into the power adapter, or 5V/500mA (or above) standard USB adapter. For example: Laptop, USB adapter, Band Power and others.

Activity/Sleep track

Equipped with a variety of sensors within the bracelet, worn on the wrist can easily identify and record the movement (currently only supports identification Running, Basketball, Cycling, three types) and the sleep state and data.

Pairing the bracelet and iWOWNfit App, you can view the previous day's sleep data in the App.

FAQ

Q: When connected with App, the data SYNC is finished but the smartband time display is still incorrect.

A: Restart the smartband and try data SYNC again.

Q: Why my smartband has no Call ID Display?

A: Android: After being connected with smartband with App, please allow "iWOWNfit" to visit calls, SMS, contacts and keep "iWOWNfit" running in background. If there are security softwares on your phone, set up the software "iWOWNfit" as "trust".

iOS: If no Call ID Display, please restart your mobile and connect the smartband again. When it is connected, please wait until the phone pops up "Bluetooth pairing request" and click "pair", then the Call ID Display function comes.

Q: The smartband icon shows the Bluetooth was connected, but the App cannot SYNC data?

A: It is caused by the Bluetooth of the phone in general. Please switch off the App first, restart the Bluetooth and repair. If the above step does not work, please restart your phone and try again.

Q: Why my smartband lose connection with my phone frequently?

A: Please check if your phone or other security software sets "iWOWNfit" as trusted App or not. If not, please set it as trusted and try again.

More questions, please refer to the instructions for use in the iWOWNfit App
