WIRELESS CONNECTING

- Switch on the speaker
- Turn on BT on your mobile
- Connect your mobile to "WP-03C"

SPCIFICATION

FREQUENCY CHARGE VOLTAGE PLAY TIME WATERPROOF PERFORMANCE 20Hz-20KHz 5V 1A Up to 12 hours IPX5

The application of TWS technology enables the left and right channels of speakers to be independent of each other and generally not physically connected, forming a stereo channel, providing users with a better auditory experience.

STEREO MODE (TWS FUNCTION) SETTINGS:

1. Turn on two speakers first, do not connect your phone first.

2. Double click the "+" or "-" button on one of the two speakers, and release it when you hear the "du du" sound. TWS will be paired and connected, After 3-4 seconds, there will be a "ding ding" prompt sound, indicating successful TWS connection. Connect your phone BT to the WP-03C device, and the two speakers will play music together to achieve a stereoscopic surround effect.

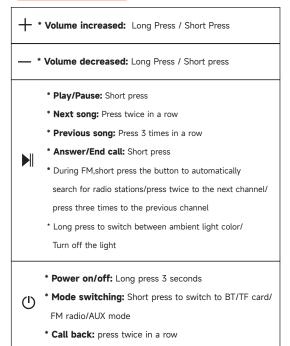

3. In TWS connection mode, devices on the left and right channels can run synchronously: play/pause, previous/next track, volume+/volume -, etc.

4. When restarting, TWS will automatically reconnect.

5. TWS disconnection: Double click the "+" or "-" button and hear a "ding" sound to disconnect TWS.

6. When the speaker main unit is turned off, the auxiliary unit will also be turned off at the same time. After shutting down, two speakers need to be turned on separately when turning on the device.

OPERSATION KEY

FCC Warnning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection againstharmful interference in a residential installation. This equipment generates, uses and can radiateradio frequency energy and, if not installed and used in accordance with the instructions, maycause harmful interference to radio communications. However, there is no guarantee thatinterference will not occur in a particular installation. If this equipment does cause harmfulinterference to radio or television reception, which can be determined by turning the equipmentoff and on, the user is encouraged to try to correct the interference by one or more of thefollowing measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1)This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
