

Federal Communications Commission  
Authorization and Evaluation Division

This product (PTZ-431W) is composed of the equivalent electric circuit to PTZ-430, PTZ-630, PTZ-631W and PTZ-930, and uses the same frequency ranges as well.  
We've already got FCC's approval with PTZ-430, PTZ-630 PTZ-631W and PTZ-930 (FCC ID : HV4PTZ).  
The difference between PTZ-431W and them are whole size and weight due to the difference of the effective area as a digitizer.  
Therefore, we would like to apply for PTZ-431W approval as a series model.

Sincerely,

A handwritten signature in black ink that reads "Hiromichi Kanzaki".
