

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the white plastic housing of the EUT (Electronic Unit Tester) and the internal circuit board. The housing is open, revealing the black PCB. A black ruler with white markings is placed vertically to the left of the components for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB has a black label with white text that reads "AAA" and "23041R".
Solder Board-Component View 1	 A photograph showing the solder board-component. The component is a small, rectangular black PCB with gold-colored solder joints. A black ruler with white markings is placed vertically to the left of the component for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB has a black label with white text that reads "AAA" and "Lecly".

Solder Board-Component View 2	 A photograph of a small electronic component on a blue textured surface. The component is a rectangular printed circuit board (PCB) with various electronic components, including a microcontroller, capacitors, and a connector. A black L-shaped ruler is placed next to the component for scale. The ruler has markings in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Antenna View	 A photograph of the same electronic component as in the previous view, showing the antenna side. A red rectangular box highlights the antenna array on the left side of the component. A red line points from this box to a label "Antenna." which is enclosed in a red rectangular box. The background and ruler are the same as in the previous view.
