

Permissive Change Letter

Date: December 2, 2024

This is to request a Class II permissive change for FCC ID: S9E-N7NEM92, originally granted on 11/25/2024.

The major changes filed under this application are:

Change #1: The certified module (FCC ID: S9E-N7NEM92; model: EM9291) is integrated into two new platforms (Product: Rugged Controller, Brand: Trimble, Model: 140000).

Change #2: Reduce the Output Power through firmware, and SAR measurement were evaluated.

Except for the above differences, the hardware design is identical with the original grant.

Should you have any enquires or comments, please have my best attention.

Sincerely,

A handwritten signature in black ink, appearing to read 'K. Allen', written over a dashed horizontal line.

Katherine Allen / Compliance Engineer
