

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a mobile phone. On the left is the yellow battery with a label containing technical specifications and safety warnings. To the right is the black plastic housing. Both are placed on a blue textured surface with a black ruler marked in millimeters (0-100 mm) and centimeters (0-10 cm) for scale.
Solder Board-Component View 1	 A close-up photograph of a small electronic component, likely a solder board or a small PCB, resting on a blue textured surface. A black ruler with millimeter and centimeter markings is visible at the bottom and left for scale.

Solder Board-Component View 2	 A photograph of a small electronic component, likely a solder mask or a small PCB, placed on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component is small and rectangular, with some soldering visible. A blue circular object is visible on the ruler.
Solder Board-Component View 3	 A photograph of a larger electronic component, likely a solder mask or a larger PCB, placed on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component is larger and more complex, with various components and soldering visible. A blue circular object is visible on the ruler.

Solder Board-Component View 4	 A photograph of a small electronic component assembly, likely a camera module, mounted on a printed circuit board (PCB). The assembly is positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (mm) from 0 to 100. The component itself is rectangular with various soldered connections and components visible.
Solder Board-Component View 5	 A photograph of a different electronic component assembly, possibly a different part of the same device, mounted on a PCB. It is also placed on a blue textured surface. A black ruler with white markings is positioned horizontally below the component, showing measurements in millimeters (mm) from 0 to 100. This component appears more complex, with more visible components and solder connections.

Solder Board-Component View 6	 A photograph of a mobile phone's internal circuit board (PCBA) laid flat on a blue textured surface. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters. The board is populated with various electronic components, including a large central chip, several smaller chips, and numerous surface-mount components. The text 'FS168-WB-V3.0' is visible on the board.
Antenna View	 A photograph showing the back of a mobile phone with its battery cover removed, revealing the internal components. A black ruler with white markings is placed horizontally below the phone. Three red boxes with leader lines point to specific antenna locations: the top-left box is labeled 'GSM1900; WCDMA B2/4; LTE B2/4 Ant', the top-right box is labeled 'WIFI/BT/GPS Antenna', and the bottom box is labeled 'GSM850; WCDMA B5; LTE B5/7/17 Ant'. The battery cover is black and has a yellow label with 'CE' and 'FC' markings.
