Board-Component
View 1**

Solder Board-Component View 2	 A photograph showing a small green printed circuit board (PCB) component mounted on a blue textured surface. The component is rectangular with several small electronic components and a black wire soldered to it. A black L-shaped ruler with white markings in millimeters is placed next to the component for scale. The ruler shows the component is approximately 10 mm wide and 10 mm high.
Solder Board-Component View 3	 A photograph showing the same small green PCB component from a different angle. The component is now shown as a square with a white solder mask and a central circular pad. A black wire is soldered to the component. A black L-shaped ruler with white markings in millimeters is placed next to the component for scale. The ruler shows the component is approximately 10 mm wide and 10 mm high.

Solder Board-Component View 4	 This image shows the underside of a circuit board, labeled 'View 4'. It features a large silver heat sink in the center, a black integrated circuit (U11) to its left, and various other components like capacitors and smaller ICs. A black ruler with white markings is placed vertically to the left of the board for scale.
Solder Board-Component View 5	 This image shows the underside of the same circuit board, labeled 'View 5'. It provides a different perspective, showing components like U17, U14, and U13. A black ruler with white markings is placed vertically to the left of the board for scale.
