
Skills requirement:

1. The material uses enameled wire, and the thickness of the enameled wire including the paint surface is 0.35mm;
2. The antenna is pasted with acetone between each circle, and the incoming material needs to be tightly wound, not loose;
3. The outgoing end of the antenna needs to be twisted twice as shown in the figure;
4. For unannotated tolerances, please refer to the B file of the mold core tolerance table.

Dimensional tolerance not marked (angle ± 1°)

Size	A	B	C
L≤6	±0.05	±0.10	±0.20
6＜L≤30	±0.10	±0.20	±0.30
30＜L≤80	±0.15	±0.30	±0.40
80＜L≤180	±0.20	±0.40	±0.50
180＜L≤315	±0.30	±0.50	±0.70
