

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup*	 A photograph showing a conducted emission test setup. On the left, a wooden desk holds a spectrum analyzer. A power supply unit sits on the floor between the desk and another wooden table on the right. Various cables connect the equipment. A smartphone is on the right table.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test setup inside an anechoic chamber. A yellow test fixture is mounted on a blue metal frame. The chamber walls are covered with white pyramidal absorbers. A yellow and black striped safety line is on the floor.

Radiation Emission Test Setup (30MHz to 1GHz)	 A photograph of a radiation emission test setup for the 30MHz to 1GHz frequency range. A white, rectangular test object is placed on a yellow, octagonal turntable. The turntable is positioned in the center of an anechoic chamber. The walls of the chamber are covered with white, square-shaped absorbers. Several vertical metal poles are visible on the left side of the chamber. The floor is dark and reflective.
Radiation Emission Test Setup (1GHz to 18GHz)	 A photograph of a radiation emission test setup for the 1GHz to 18GHz frequency range. The same white, rectangular test object is placed on the same yellow, octagonal turntable. The turntable is positioned in the center of an anechoic chamber. The walls of the chamber are covered with white, square-shaped absorbers. The floor is covered with blue, pyramid-shaped absorbers. A red and black antenna is visible on the right side of the chamber.

**Radiation Emission Test
Setup (Above 18GHz)**

*** Means' only test and setup for PART 15C .**
