Hi Mort:

A TCB may certify this Satellite phone as a mobile or fixed system, but not as a portable unit held-to-head. MPE evaluation must be performed in this case. A portable system will require filing to FCC at this time due to probe calibration issues.

Regards,

Steve Dayhoff

Please handle the attached inquiry.

Thanks,

Rich

Rich:

It's your day for questions!

We have an overseas client with a device which operates @ 30 watts R.F. and in the frequency range of 1625.5 MHz to 1660.5 MHz. They call it an "Aeronautical Satellite Phone".

Can the services of a T.C.B. be used to certify this product?

Again, best regards, Mort
